F.A.S.T. Rescue Inc.

F.A.S.T. Rescue is the first stop for all your safety needs! We offer superior Heath & Safety training and supplies. Founded in 1998, F.A.S.T. Rescue is recognized by the Federal Government, WSIB and Workers Compensation. As a partner of the Canadian Red Cross and the Heart & Stroke Foundation, our clients learn the practical skills needed to treat injuries and save lives, taught by a team of experienced professionals who have medical or emergency response and construction safety backgrounds. Our safety products run from band-aids to Regulation First Aid Kits to Automated External Defibrillators and are guaranteed to exceed industry standards. Visit our site for regulatory information and for other Health & Safety information.

TERMS & CONDITIONS

WEB SPECIALS

* Must be purchased through the website
* Must be paid in full at the time of ordering

PRODUCTS

We aim to be your total First Aid supplies provider. Our goal is to provide you with high quality at the best prices. Under normal conditions, our products will be shipped to the customer within 3-5 business days of the order. Please note however, that delivery outside of Canada is completely dependent on the customs requirements of the country that the products are being delivered to. Normal delivery into the U.S. ranges from 10-15 business days.

We offer you a 100% Satisfaction Guarantee. If you are not satisfied with your products, please return the item to us intact and unused within 30 days for a credit or exchange. A restocking fee of 15% applies. Our minimum order is $50.

AED Program Manager

First Voice + AED Program Manager is the most comprehensive yet affordable AED Program management system available. An AED & First Aid tracking program that benefits you and your customer. Compare us to the competitors and you will find we give you the best solution. Keep your data and customers protected, optimizing your profits and hard work.Built on a secure online platform the program allows users the ability to easily manage and track each AED and corresponding First Voice or first aid supplies within their facilities from any computer. This system is essential for organizations with one, or multiple AEDs and Emergency Response Teams spread out amongst various locations.Purchase a 1 year or 5 year term per AED in your organization.

Wall Cabinet

This AED cabinet is the original, patented AED cabinet and is unsurpassed in its quality, features and value. It accommodates every major AED in the market and comes in a surface mount as well as a recessed model. The surface mount unit comes with an alarm and strap. The recessed unit comes with an alarm and strobe and ties into your security system.The clear, impact resistant acrylic window makes it easy to see the AED. The ultra small keyless alarm produces 90 decibels in sound and can be operated from inside or outside the cabinet. Made with heavy duty welded steel, this cabinet has a one year limited warranty.

Code	Description	
DCAB-FR	Recessed Wall with Alarm and Strobe. Includes Security Tie-In.	425.00
DCAB-SM	Surface Mount Wall Cabinet with Alarm and Strap	250.00

Heart Case

The HeartCase is designed for ease of use. It travels to the casualty with the AED inside. Made with injection molded ABS plastic, this case is strong and durable yet light enough to be tranported easily. This case does not bend, dent, crack or rust and has no sharp edges.The indoor unit comes with an alarmThe outdoor unit is both waterproof and dustproof and comes with an alarm and strobe.Note: The HeartCase fits onlyPhilips, Physio-Control, & HeartSine AEDs.

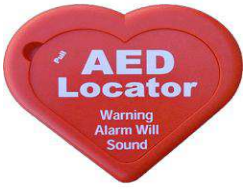
Code	Description	
DCAB-HC-I	Heart AED Case (Indoor Use)	150.00
DCAB-HC-O	Heart AED Case (Outdoor Use)	265.00

AED Bracket

Our universal AED wall bracket is made with rugged 14 gauge steel making it superior in durability and quality. The instant release strap holds the AED securely in place, even in moving vehicles. The bracket can be mounted on either vertical or horizontal surfaces, making it an extremely versatile unit. The bracket is 9" x 9" with an expandable depth of 3.5" to 7". This unit comes with a one year warranty.

Code	Description	
DCAB-WB-O	Universal AED Wall Bracket	75.00

AED Locator



Our exciting new AED Locator won the New Product of the Year Award in the AED/CPR category at the NSC 2011 Congress. Using wireless technology, this locator is able to find the nearest defibrillator in an emergency.

Lifepak Trainer Parts

The LifePak CR+ multi-lingual Trainer provides realistic training without energy discharge and is compatible with any CPR manikin system. It follows all eight American Heart Association Heartsaver AED training scenarios and all four American Red Cross training scenarios. Create a number of custom scenarios for your students with the multi-function remote control. The trainer operates on four standard D-size batteries for approximately 100 continuous hours. Simulates the automatic or semi-automatic CR+ defibrillator. Includes one AED Trainer, remote control and cable, simulated battery charger, set of reusable training electrodes capable of approximately 30 applications, carrying case (soft-sided, grey), AED Instruction Card, Operating Instructions, and batteries for remote control and AED Trainer.

Lifepak 1000

Not every cardiac emergency is the same. Neither is every responder. Your world demands flexibility—and that's exactly what the LIFEPAK® 1000 defibrillator delivers.The rugged LIFEPAK 1000 defibrillator is an easy-to-use automatic external defibrillator (AED) from the leader in defibrillation technology. But it's also a defibrillator powerful and adaptable enough for professional responders, featuring advanced capabilities that can help improve lifesaving outcomes and speed the transition of cardiac patients to the next critical level of care.

Defibrillators > Physio-Control > Lifepak CR Plus

LifePak CR+

Simple to use and simple to own, the LifePak CR Plus AED is fully automatic, with a simple two-step process that gives the first person to respond to a SCA victim the confidence they need to help save a life. A responder only needs to turn on the device and apply the QUIK-PAK electrode pads to the casualty. The fully automatic model of the LifePak CR Plus AED is designed to deliver a shock only if it determines a heart needs it. No one even needs to press a shock button. The LifePak CR Plus AED is also easy to own and maintain. Synchronized replacement of the electrodes and battery CHARGE-PAK will keep your maintenance burden at a minimum. And weekly and monthly self-tests—plus a visible readiness display with four indicators—let you know it is ready to do its job.

Defibrillators > Physio-Control > Lifepak Express

LifePak Express

The LifePak Express AED from Physio-Control is designed to be used by the first person to respond to a sudden cardiac arrest (SCA) victim – easily, safely, and effectively. Although not everyone can be saved from sudden cardiac arrest, studies show that early defibrillation can dramatically improve survival rates. And because some people are more difficult to defibrillate than others – and may need more than 200J – the LifePak Express AED has the capability to escalate energy up to an industry-leading 360J. The LifePak Express is built with the same advanced technology trusted by more EMS and medical professionals than any other brand.

Code	Description

Instructors > Instructor Equipment > Manikins

Rescue Randy

Developed for lifelike adult or juvenile patient handling, transportation, and extrication training. These manikins can be safely used in situations too hazardous or uncomfortable for human volunteers. Made of tough cast vinyl with zinc-plated steel frame for longevity and rugged use. Manikins are fully articulated for positioning in widely diversified training environments. The manikins can be seated in an automobile, positioned in a smoke-filled room, and immobilized on a stretcher for mountain rescue instruction. Useful for simulating the removal of victims from utility poles, conduits, mine cave-ins, tunnels, and limitless other training procedures. Perfect to use with the Manikin Moulage Kit for casualty simulation, this Rescue Randy is made to meet your rescue needs. Each unit has a 3 year warranty.

Code	Description	
FISB321-AF	Flexible Rescue Randy. 5.5 ft. tall.	963.30
FISB321-AR	I.A.F.F. Rescue Randy with additional Reinforcement. 6 ft. tall	1,342.90
FISB321-AU	Lightweight Rescue Randy. 55lb (121 kg). 5.5 ft. tall	850.00
FISB321-AW	Weighted Rescue Randy. 105 lb (231 kg). 5.5 ft. tall.	946.35

Combat Challenge

Developed for lifelike adult or juvenile patient handling, transportation, and extrication training. This manikin can be safely used in situations too hazardous or uncomfortable for human volunteers. Made of tough cast vinyl with zinc-plated steel frame for longevity and rugged use. Manikin is fully articulated for positioning in widely diversified training environments. The manikin can be seated in an automobile, positioned in a smoke-filled room, and immobilized on a stretcher for mountain rescue instruction. Useful for simulating the removal of victims from utility poles, conduits, mine cave-ins, tunnels, and limitless other training procedures. Perfect to use with the Manikin Moulage Kit for casualty simulation. Named the official manikin of the Firefighter Combat Challenge, this manikin duplicates the weight and resiliency of a human body and features a rust-resistant steel skeleton with cables of 4200-lb. break strength. The manikin comes dressed in sweatpants. Three-year warranty.

Code	Description	
FISB333-AU	Rescue Randy Combat Challenge. 145 lb (319 kg). 6 ft. tall.	1,121.90
FISB333-AW	Rescue Randy Combat Challenge. 165 lb (363 kg). 6 ft. tall.	1,280.55
FISB333-RRK	Combat Challenge Kid. 4 ft. tall	417.05

Airway Larry

This adult manikin is a great trainer for introductory as well as advanced students. Manikin simulates a nonanesthetized patient for practicing intubation, ventilation, suction, and CPR techniques. The realistic anatomy and landmarks include teeth, tongue, oral and nasal pharynx, larynx, epiglottis, arytenoids, false cords, true vocal cords, trachea, lungs, esophagus, and stomach. The manikin allows you to practice oral, digital, and nasal intubation, as well as E.T., E.O.A., P.T.L., L.M.A., E.G.T.A., Combitube®, and KING System insertion. Suction techniques and proper cuff inflation may also be practiced and evaluated. Applying pressure to the cricoid cartilage changes the position of the trachea and closes the esophagus, allowing realistic practice of the Sellick maneuver.

Code	Description	
ILF03671U	ILF03671U	1,957.50

CP Arlene

This CPR manikin consists of a full-bodied basic torso. The sanitary face mask is designed with a one-way non-rebreathing valve and is disposable or may be reused after proper disinfection. The molded hair gives a life-like feel but requires no maintenance. Disposable tracheal airway and lower airway with lung bag eliminates time-consuming disinfection procedures. This unit comes complete with one sanitary face mask, one disposable tracheal airway and lung, and a hard carrying case.

Code	Description	
ILF03943U	ILF03943U	1,343.25

Actar 911

The affordable Actar CPR training system is excellent for group instruction. One manikin per student means more hands-on practice. ACTAR is easy to clean, low maintenance, lightweight and compact.

Code	Description	
IMA-A-1	Actar 911 Trooper (Qty:1). Single adult manikin with 5 disposable lungs, instruction card and corrugated plastic carrying case for personal CPR practice. Weight 0.8 kg (1.7 lb.)	110.00
IMA-A-10	Actar 911 Squadron (Qty:10). ACTAR 911 SQUADRON : 10 adult manikins, 100 disposable lungs, video, instruction card and a durable nylon bag with carry handles and shoulder strap. Weight 8 kg (17 lb.)	865.00

IMA-I-1	Actar 911 Infantry (Qty:1). Single infant manikin, 5 disposable lungs with shoulder bag.	110.00
IMA-I-10	Actar 911 Infantry (Qty:10). 10 infant manikins, 100 disposable lungs, instruction card and video in durable carry bag with shoulder strap. Weight 5.5 kg (12 lb.)	815.00
IMA-I-5	Actar 911 Infantry (Qty:5). 5 infant manikins, 100 disposable lungs, instruction card and video with nylon carrying bag with shoulder strap. Weight 3 kg (7 lb.)	415.00

Actar D-fib

Actar D-fib manikin with nylon tote bag. Lightweight (1kg) Comes with disposable lungs and CPR CD that meets new resuscitation standards. The Actar D-fib features a closeable airway and is designed to facilitate jaw thrust. The chest rises and falls, but only if the rescuer achieves a patent airway. With Actar D-fib you save time and hassle: no bleach soaking required and disinfection between users isn't necessary. ACTAR D-fib's disposable lung doubles as a face shield/barrier.

Code	Description	
IMAD-1	Actar D-fib - Single	145.00
IMAD-10	Actar D-fib - Compact 10	975.00
IMAD-25	Actar D-fib - Compact 25	2,595.00

IMAD-5	Actar D-fib - Compact 5	555.00

CPR PROMPT™

CPR Prompt manikins make it affordable for instructors to provide a one-student-to-one manikin training ratio in CPR, AED use, & the Heimlich maneuver. The manikin's unique design is not only durable enough to withstand the equivalent of 10,000 student usages, but its tough, yet soft foam-based construction makes the manikin extremely lightweight (5-pack weighs less than 15 lbs.) and portable. Our manikins provide valuable student feedback and require minimal cleaning when used with the single-use face shield/lung bags. The 7 pack consist of 5 adult/child and 2 infant manikins.

Code	Description	
IMC-A-1	CPR Prompt Adult/Child Training Manikin w/10 A/C face shield lung bags	95.00

Prestan

The Prestan Adult/Child and Infant manikin is available individually or in convenient multipacks of four for class training purposes. These manikins are uniquely designed as a clamshell that accommodates an easy-to-insert face shield/lung bag. Prestan's revolutionary new CPR Rate Monitor allows for instant feedback to both instructor and student regarding the rate of chest compression. This allows each student to gauge their rate of compressions on their own as well as allowing the instructor to monitor several students quickly and easily.

Code	Description

Shoe Covers

These shoe covers are ideal to protect footwear in certain work environments. Made of non-woven polypropylene, they have a textured bottom to protect against skid resistance. The elasticized top allows for easy donning and doffing. The flexible material ensures ease of movement. These covers come in packages of 1000.

Code	Description	
PFBC-Large	Shoe Covers (Qty: 1000 pairs). Large	106.00
PFBC-Small	Shoe Covers (Qty: 1000 pairs). Small	104.00
PFBC-XLarge	Shoe Covers (Qty: 1000 pairs). X-Large	113.00

Knee Pads

These heavy-duty knee pads are made with a high density foam liner which is water resistant and provides maximum protection. The flexible rubberized shell provides superior resistance against abrasive surfaces and the adjustable wide nylon straps provide better fit and increased comfort.

Code	Description	
PFKP-BKP	Blue Hinged Knee Pads, Pair	54.95
PFKP-HKP	Half Blue Knee Pads, Pair	10.50
PFKP-PKP	KneePro Knee Pads, Pair	64.95

Toe Caps

These economical toe caps are made of molded high impact plastic. They provide lightweight foot protection. They are excellent for use by plant visitors and inspections. One size fits all. Sold by the pair.

Code	Description	
PFTC-M	Mens Toe Caps	49.35
PFTC-W	Womens Toe Caps	44.60

Protective Wear > Gloves > Disposable Gloves > Latex

ThickSkin

These 15 mil latex gloves combine the best features of a dishwashing glove and a disposable glove into one. Heavy duty Natural Rubber gives these gloves comparable puncture and tear resistance to a dishwashing glove. However, the ambidextrous shape and unlined construction give it the feel and fit of disposable. The textured grip gives these gloves good wet grip.

Code	Description

Protective Wear > Gloves > Disposable Gloves > Polyethylene

Extra Long

Inexpensive, throwaway polyethylene gloves. Embossed pattern grip. Ambidextrous pattern. Roomy fit for easy on and off. Thickness is .02 mm. Good sense of touch and dexterity. Agriculture Canada (CFIA) Approved for Food Handling. These disposable safety gloves are 36 inches in length and come in boxes of 100 gloves.

Code	Description	
GPD36	GPD36	9.80

Protective Wear > Gloves > Reusable > Chemical > Cryogenic

Cryogenie

Superior's Cryogenie extreme-cold cryogenic glove offers full hand protection specifically for working with liquid nitrogen. Frostbite occurs mainly when touching surfaces that have been cooled by cryogenic liquids, and the best hand protection in this scenario is a glove that provides insulation and has a loose fit. Our gloves protect against both contact injury and splash, and can be easily removed. They feature a silicone-coated palm, which has the added benefit of excellent grip in extreme temperatures; this material will not crack and remains flexible even at -250 °F (-160 °C). Four layers of material provide the high degree of insulation required for working in such extremes: an outer layer of silicone on the palm, combined with back/glove body made from a triple layer of tough polyester/polyurethane/polyester; two middle layers consisting of Porelle® waterproof liner, to protect against splash of cryogenic liquids and Thinsulate LiteLoft™ (the highest thermal weight-efficiency available in a synthetic) ; and a final inside layer of cotton jersey for softness and comfort against the hand. Meets EN511 standards for extreme cold protection. Qty: 1 pair.

Code	Description	
GR645C-CRY	Silicone Palm, Waterproof & Thinsulate Liner, 3 Layer Poly/PU/Poly Shell (Qty: 1 Pair)	81.20

Protective Wear > Gloves > Reusable > Chemical > Cryogenic > Lineman

Mitt

The softness and natural breathability of the leather is not effected by the water repellent treatment. Other special features include our performance thumb/palm patch which reinforces the critical wear areas with a double layer of leather. the back of the cuff is made with a fluorescent yellow leather with a contrasting red stripe for daytime visibility and a 3M Scotchlite™ retro-reflective stripe for night time visibility. All our Deluxe™ Lineman Mitts and Gloves are sewn with Kevlar® thread for extra seam strength. Thinsulate™ is a registered trademark of 3M. Qty: 1 pair.

Protective Wear > Gloves > Reusable > Chemical > Neoprene

Butyl

Chemstop butyl and Viton®-butyl gloves are highly impermeable to gas or water vapors, protecting workers who handle highly toxic substances. Butyl construction is flexible, providing excellent dexterity even in low temperatures. Butyl protects against esters, ketones, strong oxidizing agents and a wide range of harsh chemicals that natural rubber is less effective against, because it is a harder and less porous material that nonetheless has an elastic quality. Butyl rubber will degrade when exposed to agents such ammonia or certain solvents, but much more slowly than similar elastomers, making it the most robust material for chemical resistance gloves.Viton®-butyl gloves go a step further, doubling your protection with gloves that protect against caustic chemicals in all temperature extremes. Viton® is a fluoroelastomer, which is a special purpose fluorocarbon-based synthetic rubber with wide chemical resistance, especially in high temperature applications in different media. Suitable for a wide variety of highly toxic chemicals. Qty: 1 pair.

Code	Description

Protective Wear > Gloves > Reusable > Chemical > Nitrile

Cold Resistant

Our chemical- and cold-resistant supported gloves feature a specially formulated nitrile that provides outstanding performance in extreme cold. It will not become brittle, and more importantly, won't crack in extreme cold, so the high chemical resistance of nitrile is never jeopardized. Gloves also retain their dexterity in the cold in addition to their great puncture and abrasion resistance.Choose between two styles: 30 cm. gauntlet style for extra wrist protection, or a fully coated knit-wrist style for snug, stay-in-place fit. Both styles feature a forchette thumb for better fit and comfort, and sand-patch grip on the palms to channel oils and liquids away for a more secure grip when working in wet or oily conditions. Gloves are lightweight for better dexterity and comfort, and will fit over a liner for increased warmth.

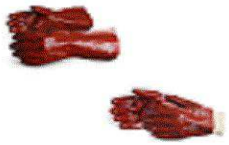
Nitrile

Anti-vibe, impact-resistant nitrile gauntlet-style combines chemical/oil resistance with a unique anti-vibe layer over just the palm area or the whole hand. This formed chloroprene layer (exceeds the ISO 10819:1996 standard for hand and arm mechanical vibration and shock) is held in place between a cotton jersey support and a nitrile exterior. These gloves are ideal for the petro-chemical industry, with their sand-patch grip on the palm area that channels oils and liquids away from smooth surfaces for increased wet/dry grip. Ergonomic glove is lightweight and comfortable for reduced hand fatigue.

Code	Description	
GRV23-Large-NIT	Large-Blue 12in Nitrile Glove, Anti-Impact Padded (Qty: 1 Pair)	72.95
GRV23-Medium-NIT	Medium-Blue 12in Nitrile Glove, Anti-Vib padded palm (Qty: 1 Pair)	71.95

Protective Wear > Gloves > Reusable > Chemical > PVC

Coated



Our nitrile gloves offer excellent protection against a broad range of chemicals and are abrasion, puncture and snag resistant. Embossed finish for better grip. All of our N Series Nitrile Gloves are Agriuculture Canada Approved for Food Handling Applications: red meat and poultry processing, chemical processing, machining operations using cutting oil, battery manufacturing.

Code	Description	
GRJY200-GNT12	PVC Glove, Red, Jersey Lined, 12in Length, CFIA Approved	38.95
GRJY200-KM	PVC Glove, Red, Jersey Lined, Knit Wrist CFIA Approved	30.00

Unlined

High oil and animal fat resistance, so ideal for poultry and meat packing industries. 9 mil thickness in glove body and 16 mil thickness in finger tips. Means double the strength, puncture and snag resistance where you need it most. USDA approved, Latex free and Phenol Free. Many food plants are switching to non-latex gloves to address concerns about latex allergies. Both for their own workers and for the consumer.There are different colours for each size to make these gloves easy to sort after washing. An anti-mildew agent has been incorporated into the gloves.Orange tips = size SmallYellow tips = size MediumGreen tips = size LargeWhite tips = size X-Large

Heavy Duty

We use a heavier weight PVC in these Torpedo Plus™ gloves. We start with a seamless-knit cotton 13-gauge shell and dip them in blue PVC over an ergonomically shaped hand form. We use only a premium, super-soft, flexible PVC formulation. All styles are CFIA approved for food handling.

Code	Description	
GRVSH -Cotton	Blue Heavy Duty Double Dip, Seamless Knit Cotton Liner, 12in (Qty: 12 Pair)	54.40
GRVSH -KV	Blue Heavy Duty Double Dip, Seamless Knit Kevlar Liner, 12in (Qty: 12 Pair)	178.20

Protective Wear > Gloves > Reusable > Cleanroom

Dyneema

Seamless-knit glove made with lint-free, continuous-filament Dyneema® blended with ESD carbon filament to impart anti-static properties. Fine-gauge (400-denier) gloves cleanroom treated to eliminate dust and particulate contamination, and made with THT™ for a superior fit. Ideal for those in the electronics industry, or any application where cut protection, great touch sensitivity and low linting is needed, like precision work on circuit boards, etc. Qty: 1 pair.

Code	Description	
GRCR1 -Large	Large-Cleanroom String Anti-Static Dyneema/ESD Carbon glove (Qty: 1 Pair)	7.50
GRCR1 -Medium	Medium-Cleanroom String Anti-Static Dyneema/ESD Carbon glove (Qty: 1 Pair)	7.50
GRCR1 -Small	Small-Cleanroom String Anti-Static Dyneema/ESD Carbon glove (Qty: 1 Pair)	7.50
GRCR1 -XLarge	XLarge-Cleanroom String Anti-Static Dyneema/ESD Carbon glove (Qty: 1 Pair)	7.50

Nylon

Two continuous filaments of conductive carbon yarn are knitted completely throughout every STNCF glove. This gives the STNCF a very high degree of static dissipation and an excellent surface resistance of 105 ohms per square (ASTM D-257). It offers good comfort and dexterity. Qty: 12 pairs.

Code	Description	
GRCR2 -Large	Large-String Grey Nylon Carbon Filament Anti-Static, Cleanroom Processed (Qty: 12 Pair)	47.90
GRCR2 -Medium	Medium-String Grey Nylon Carbon Filament Anti-Static, Cleanroom Processed (Qty: 12 Pair)	47.90
GRCR2 -Small	Small -String Grey Nylon Carbon Filament Anti-Static, Cleanroom Processed (Qty: 12 Pair)	47.90
GRCR2 -XLarge	XLarge-String Grey Nylon Carbon Filament Anti-Static, Cleanroom Processed (Qty: 12 Pair)	47.90

Protective Wear > Gloves > Reusable > Cotton & String > Cotton

Tire Core

Up to eight times longer-wearing than our regular 7-gauge nylon gloves, these SureKnit™ gloves are reinforced with Tire-core. They also do not soak up water, oil or other liquids, making them an excellent choice for fishermen. Grey color hides dirt better, and they are CFIA approved for food handling. Made with THT™ (True Hand Technology) for less hand fatigue and greater comfort. Qty: 12 pairs.

Code	Description	
GRC2 -Large-DTS	Large-String Nylon / Tire Core Glove PVC Dotted 2 sides (Qty: 12 Pair)	15.30
GRC2 -Large-Regular	Large-String Nylon Glove Blended Tire Core (Qty: 12 Pair)	10.70
GRC2 -Medium-DTS	Medium-String Nylon / Tire Core Glove PVC Dotted 2 sides (Qty: 12 Pair)	15.30
GRC2 -Medium-Regul	Medium-String Nylon Glove Blended Tire Core (Qty: 12 Pair)	10.70
GRC2 -Small-DTS	Small-String Nylon / Tire Core Glove PVC Dotted 2 sides (Qty: 12 Pair)	15.30
GRC2 -Small-Regular	Small-String Nylon Glove Blended Tire Core (Qty: 12 Pair)	10.70

GRC2 -XLarge-Regula	XLarge-String Nylon Glove Blended Tire Core (Qty: 12 Pair)	10.70

Canvas

Cotton canvas (unbleached) is a great, all-purpose material that offers excellent protection against abrasion. Lightweight and comfortable, their breathability is what makes them the perfect choice for light-duty, economical hand protection. We offer a variety of styles for any application where threat of injury to the hand is low. 8 oz. canvas withstands repeated washings and can be bleached. Available in Mens or Ladies. Qty: 12 pairs.

Code	Description	
GRC3 -HW-GNT	12oz Cotton Canvas Glove, Knit Wrist Cuff (Qty: 12 Pair)	23.30
GRC3 -HW-KM	12oz Cotton Canvas Glove, Gauntlet Cuff (Qty: 12 Pair)	20.63

Protective Wear > Gloves > Reusable > Cotton & String > String Knits

Nylon

Heavyweight 7-gauge nylon glove, with 8" cuff for greater forearm protection. Will not soak up liquids, making them an excellent choice for fisheries and food handling. (CFIA approved.) Speckled blue and white color hides stains etc. Knit with THT™ (True Hand Technology), for greater comfort and less hand fatigue.

Code	Description	
GRS3-LCF	String knit Nylon Blue / White speckled, 4in knitted Cuff (Qty: 12 Pair)	28.50
GRS3-XLCF	String knit Nylon Blue / White speckled, 8in knitted Cuff (Qty: 12 Pair)	35.20

Protective Wear > Gloves > Reusable > Cut > Dyneema > Fiberglass

ASTM 3-Palm Coated

This glove combines three really tough materials to create one amazingly cut-resistant glove that also happens to be incredibly comfortable. When high-tech fibres are added to composite yarns, the results are impressive. Fibreglass on its own is brittle, and while it scores well in some aspects of cut-resistance, does not in itself stand up well to direct cut. However, when combined with Dyneema®, brittleness is no longer an issue, as the fibreglass is now strengthened and supported by the surrounding material. Nylon added to this composite enhances toughness and wear, while the ergonomically curved hand and finger shape of the seamless knit shell provides all-day comfort. Palms are coated with tough polyurethane for grip and added durability in wet/dry or oily conditions. CFIA approved for food handling. Dyneema® is a registered trademark of Royal DSM N.V. Qty: 1 pair.

Code	Description	
GRD13F2 -Size 10	Size 10 String knit Dyneema / Fibreglass, PU Palm Coated. Cut Level 3 (1 Pair)	15.80

Protective Wear > Gloves > Reusable > Cut > Dyneema > Latex

ASTM 3-Fiberglass

If you're looking for a glove with exceptional cut protection, and an excellent grip, look no further. Our new glove made with Dyneema® features latex crinkle-finish palm coating to bring together two great properties and add a few more along the way. Textured latex offers good grip in both wet and dry applications. The crinkle texture channels fluids away from surface for enhanced grip. Gloves are snug fitting, highly dextrous and breathable, for all day comfort.The grey color hides stains as well, for longer wear. Washable for reuse many times over.Dyneema® is a registered trademark of Royal DSM N.V. Qty: 1 pair.

Code	Description	
GRD13L1 -Size 10	Size 10 Dyneema/Fiberglass Glove, Blue Latex Crinkle Grip Palm Coat. Cut Level 3 (1 Pair)	19.60
GRD13L1 -Size 6	Size 6 Dyneema/Fiberglass Glove, Blue Latex Crinkle Grip Palm Coat. Cut Level 3 (1 Pair)	19.60

GRD13N4 -Small	Small String Knit Dyneema w/ Black Foam Nitrile Coating, 12in. Cut Level 3 (1 Pair)	33.10
GRD13N4 -XLarge	Large String Knit Dyneema w/ Black Foam Nitrile Coating, 12in. Cut Level 3 (1 Pair)	33.10

ASTM 4-Fibreglass

Three tough materials have been combined to create one 'extreme' cut-resistant glove that also happens to be incredibly comfortable, with a foamed nitrile palm coating for excellent wet/dry grip. When fiberglass is combined with Dyneema®, it is strengthened and supported by the surrounding material. We added nylon to this composite to enhance toughness and wear. Ergonomically curved hand and finger shape of the seamless knit shell provides all-day comfort. Air bubbles in the nitrile palm-coating work to increase grip in oily conditions by displacing the oil on the surface of materials like metal and glass. Gloves provide unparalleled cut resistance with high dexterity and flexibility. Metal workers and glass handlers have the assurance of superior cut protection and a no-slip grip.Dyneema® is a registered trademark of Royal DSM Group N.V. Qty: 1 pair.

Protective Wear > Gloves > Reusable > Cut > Kevlar > Fiberglass

ASTM 3-Nitrile

Cut-resistant 10-gauge knit offers high dexterity. A composite blend of Kevlar® and fiberglass provides 1350 grams of cut resistance for ASTM level-3 protection. Fiberglass is encased by Kevlar® during the spinning process, keeping the fibers in place and working in combination to dull cut hazard considerably. We've plated the inner surface of the glove with cotton to protect the hands of workers with sensitivity to fiberglass.Our seamless-knit shell is ergonomically-designed with a curved hand and finger shape for unsurpassed comfort and dexterity. Dipped in polyurethane for non-sticky, non-shedding grip that is also non-marring for handling glass. Dipped while on a hand mold for a true fit. And because the back of the hand is uncoated, gloves are highly flexible and breathable.Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.

Protective Wear > Gloves > Reusable > Cut > Kevlar > Leather

ASTM 4-Mesh Lines

Our popular 'Action' string knit Kevlar® gloves with split leather palms have become an industry standard for cut resistance and durability. So, we've been developing and testing something to take that lineup to the next level. Introducing the SKLPSMT: unbelievably strong performance, in the three most vital areas of protection: Abrasion, Cut and Puncture, with EIGHT layers of fine stainless-steel mesh between the leather and the Kevlar® knit in the most critical areas: the thumb, first two fingers and the crotch. A single layer of mesh is in between the entire leather palm and shell. Testing done on these gloves for abrasion reached 10,000 cycles without reaching failure. On the palm area, 7.16 kilos of force were applied before they would puncture, and on the thumb and first two fingertips, it took up to 12.85 kilos of force. Cut resistance is where these gloves are truly off the charts - the thumb, first two finger-tips and thumb crotch are an incredible - and unheard of - over 21,000 grams of cutting force. To acheive a Cut Level of 5, a glove must score 3500 grams. For the palm, we achieved a very high Cut Level 4, with a 3400 gram test result. We are so far off the scale, we even amazed ourselves. And so, we call it the TRIPLE PLAY.The Workplace HR & Safety Commitment to Worker Safety Award recognizes achievements in safety equipment product development.Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.

Code	Description

GRK13L5 -XLarge	String Kevlar, Split Lthr Palm, Puncture Resist. Mesh Lined. Cut Level 4 - XLarge	20.30

ASTM 5-Split Palm

Superior's popular Triple Play string-knit Kevlar® gloves with split-leather palms have become an industry standard for cut resistance and durability. They offer exceptional protection against cut, abrasion and puncture with durable Tri-tan leather palms that wrap around the back of the fingers and the thumb. Made with A-grade split leather and attached to a cut-resistant knit shell using Kevlar® thread, seams are kept away from critical wear areas, so they keep going long after other gloves find their way to the garbage bin. The wrap around palm also ensures greater protection on the side and tips of the fingers. Our new SKSMLP gloves have numerous features that, in combination, give them a stunning 3600+ grams of cut resistance. A single layer of mesh is in between the entire leather palm and shell, but this is no ordinary steel mesh. We specifically developed it to be exceptionally cut resistant, yet softer and more supple than anything we have used before. This not only means less hand fatigue, but greater safety, since a more comfortable glove is a safer glove. The Kevlar® outer shell is a composite blend of wire-core steel and Kevlar®, for a dramatically higher cut rating than our regular Kevlar®. Our new gloves are knit on a wider needle bed too, so the addition of the steel-mesh liner does not compromise the comfortable fit of the glove. We've added a moulded-rubber impact-resistant knuckle pad for extra protection against knocks; and long, snug, knit-wrist cuffs to keep gloves securely in place. Cut resistance is rated as ASTM level 5, and CE level 5.Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.

ASTM 4-Leather Palm

The most recent addition to our line of Emerald CX cut-resistant gloves is the SKWCPLTC, which features the exceptional cut-resistance engineered into our Emerald CX yarns (a blend of Kevlar®, wire core steel and polyester) with the added protection of a split-leather, reinforced thumb patch. The result is that you have increased cut-resistance in the mostcritical area - the crotch of the thumb - without sacrificing the touch sensitivity and dexterity of a string glove. So, in situations where workers are handling sheet metal or glass, where touch sensitivity is as important as protecting the inside of the thumb area, this glove is the perfect choice.

Code	Description

GRK13S4 -XLarge	String Kevlar/Wire/Poly Glv, Leather Thumb Patch, ASTM 4/CE 5 - XLarge	11.90

ASTM 4-Wire Core & Poly

Kevlar® composite-knit glove protects against the extreme hazards faced by metal stampers. Gloves score exceptionally high in both cut and abrasion categories. The yarn construction imparts a ‘rolling’ quality, so sharp edges slide off the surface and dissipate cut. And, gloves with high abrasion resistance have a more consistent level of cut resistance over the life of the glove. With the same cut-level 4 rating as our SKWCP35, the SKWCPT now has over twice the abrasion resistance, for longer glove life and greater cost savings.Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.

Freezer

Arctic Circle™ Brown split leather Freezer glove has a double palm and thumb patch, with extra-thick C200 Thinsulate™ lined, extra-long orange knitwrist. Thinsulate™ is a registered trademark of 3M. Qty: 12 pairs.

Code	Description	
GR678W -Regular	Split Leather Freezer Glove, C200 Thinsulate Lined, Knit Wrist (Qty: 12 Pair)	171.40

Protective Wear > Gloves > Reusable > Fitters

Cowgrain

Endura® economy patch-palm fitters glove is made from smooth top-grain leather for durability, dexterity, and oil and water resistance. A best seller, the fingertips and knuckle straps are leather, and backs have elastic for good fit. Qty: 12 pairs.

Code	Description	
GR76A -Large	Large-Grain Cowhide Patch Palm Fitters, Safety Cuff (Qty: 12 Pair)	36.90
GR76A -Medium	Medium-Grain Cowhide Patch Palm Fitters, Safety Cuff (Qty: 12 Pair)	36.90
GR76A -Small	Small -Grain Cowhide Patch Palm Fitters, Safety Cuff (Qty: 12 Pair)	36.90
GR76A -XLarge	XLarge-Grain Cowhide Patch Palm Fitters, Safety Cuff (Qty: 12 Pair)	36.90

Reflective

Here's the perfect glove for many types of construction, particularly road construction where traffic safety is critical. These durable, gunn-cut, grain-leather gloves provide high visibility, day and night, with their combination of fluorescent nylon backs and 3M Scotchlite™ reflective stripes. Leather palms feature wrap around index finger, leather fingertips, and leather knuckle straps. Leather on the front of fingers extends two thirds of the way around each finger, eliminating exposed seams in palm wear area. Three styles to choose from, all with band-top wrist style. Cowgrain offers comfort, durability and abrasion and heat resistance. Pigskin offers greater tolerance to wet conditions; leather won't harden and crack after exposure to liquids. Qty: 12 pairs.

Code	Description	
GR76R -FLL	Grain Cowhide, Reflective Yellow Nylon Back, Fully Fleece Lined (Qty: 12 Pair)	178.10
GR76R -TLL	Grain Cowhide, Reflective Orange Nylon Back, Thinsulate Lined (Qty: 12 Pair)	184.40
GR76R -ULND	Grain Cowhide Fitters, Reflective Nylon Back, Lined Palm (Qty: 12 Pair)	128.00

Protective Wear > Gloves > Reusable > Glove Liners

Jersey

Warm, cotton-jersey knit gloves are clute-cut from stretchy, 9 oz. knitted jersey. Featuring red jersey inside lining. Slip-on styling for ease of donning. Great for mild winter weather or wear them in winter as glove liners.

Code	Description	
GRL1 -FLL	Brown 10oz Jersey Glove, Fleece Lined (Qty: 12 Pair)	36.30
GRL1 -FML	Brown 22oz Jersey Glove, Foam Lined, Knitwrist Cuff (Qty: 12 Pair)	28.50
GRL1 -Regular	Brown 9oz Jersey, Clute Cut, Knit Wrist (Qty: 12 Pair)	15.30

Winter

Superior Glove is a Dupont certified manufacturer of Thermolite® Gloves. Thermolite® gloves are made of a unique hollow-core fibre that wicks perspiration away from your skin, while the inner layer remains warm and dry. They have fast evaporation rates - dries 50% faster than cotton. Also shrink-resistant, machine-washable, extra soft for non-chafing comfort, plus high thermal insulation. Thermolite is a registered trademarks of E.I. du Pont de Nemours and Company. Available in Black or White.

GRSQS -XLarge	Sidewall String Cotton/Poly Glove Split Leather Palm (Qty: 12 Pair) XLarge	30.40

Protective Wear > Gloves > Reusable > Lineman

Reflective Glove

These deluxe lineman gloves are made with select heavyweight 3-1/2 oz grain horsehide leather, that has been treated with a fluoro-chemical water-repellent emulsion for excellent water, oil, and stain-repellent properties. (The soft, breathable qualities of the leather are not affected by this water-repellent treatment.) Other special features include our performance thumb/palm patch, which reinforces critical-wear areas with a double layer of leather. Sewn across the back of the leather cuffs are heavy-duty 2" high-viz fluorescent-yellow fabric strips and retro-reflective silver strips for greater night-time visibility. All styles are sewn with Kevlar® thread for extra seam strength. Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company. Qty: 1 pair.

Code	Description	
GR365 -Large-Regular	Deluxe Linemans Glove, 2in Reflective Cuff (Qty: 1 Pair) Large	29.60

Protective Wear > Gloves > Reusable > Mechanic

Extrication

Surge Extrication gloves are constructed of supple, flexible, yet strong, dark grey .8mm Clarino® man-made leather, which is machine washable. Black polyurethane coated Kevlar® palm and finger patches for cut and abrasion resistance. Palm patches are lined with anti-vibration foam padding. Padded knuckle strap is made of Black Kevlar® reinforced with Stainless Steel Wire. Egg yolk yellow, stretch Cordura® back of hand and cuff, for comfort and durability. Also available in black. Back of glove is lined with TR2 jersey for comfort. Sport glove Forchette pattern for maximum dexterity, comfort and fit. Elasticized turtleneck cuff keeps broken glass and debris out of glove.

Code	Description

Anti-Impact

This new addition to our Clutch Gear® line features anti-impact, dense, thermo-plastic foam rubber patches at the back of the hand to protect only in the places where impact occurs, so glove stays fully flexible. PVC SureGrip palm patches offer durable, cushioned grip in just the right places. A Kevlar® thumb patch extends the life of the glove in the highest wear area. Two styles to choose from: a summer version with Velcro at the wrists to provide a snug, custom fit.; and a winter version with 40 gram fleece-lining and 2-inch Neoprene cuffs. The winter version also features special waterproof Enprotex® lining for stay-dry comfort. Great styling and comfort.

Code	Description

GRN9-SC	Nitrile Glove Fully Coated, Safety Cuff (Qty: 12 Pair)	39.40

Nitrile Impregnated

Superior's DEX-FLEX fitter-style gloves feature nitrile-impregnated fabric on the palms, fingertips and knuckle strap, and cotton backs for exceptional durability and abrasion resistance. A great alternative to leather, they offer better comfort, better flexibility and great fit. Band-top safety cuff and elastic at back of wrists keep gloves in place. Gunn-cut glove style features full nitrile thumb and forefinger.

Code	Description	
GRNIB-ULND	Nitrile Coated Glove, Fitters Style, Safety Cuff (Qty: 12 Pair)	58.90

Nitrile-Dipped

The tough nitrile coating on our DEXTERITY™ NT gloves is foamed for superior grip in oily conditions. Foamed nitrile works by absorbing oil on surfaces and displacing it. Nitrile also provides superior abrasion, cut and puncture resistance, while 100% Kevlar® seamless-knit shell provides comfort and great dexterity. CFIA approved for food handling.

Protective Wear > Gloves > Reusable > Ski Gloves

Deluxe

Just in time for winter, Superior introduces the SnowForce glove, where high style meets high tech. We've created a glove that is breathable, waterproof and windproof, yet offers great dexterity too, by taking advantage of several high-functioning fabrics developed with harsh winter conditions in mind. These are gloves that you'll love to wear, hard-working but with superb styling, on the job or off. Featuring genuine Clarino® palms for super flexibility and long wear, anti-slip PVC patches in critical palm and fingertip areas for excellent grip even in wet conditions; gauntlet cuffs that adjust for a custom fit using velcro tabs, and elastic at the wrists to ensure a snug fit and lock out the cold. Finger tips have a unique wrap around design to eliminate seams, allowing for excellent fingertip sensitivity, considering that these are winter work gloves. Inverted pleats at the back of the finger joints enhance comfort and dexterity, and shape the glove to the hand. Three layers of insulation - including 100 gram/square meter weight of warm yet surprisingly thin HeatLok insulation - provide maximum warmth with minimum bulk. Also featuring Porelle Ski-Dri²™ waterproof, breathable insert, that locks out water and wind while moisture from sweaty hands is not locked in. Kevlar® and stainless-steel covered, foam-padded knuckle strap for protection against hard knocks, scrapes and abrasion. Glove back, sidewall and forchettes are stretchy nylon/ lycra for a combination of toughness and flexibility, while the Snowforce logo on the cuff and index finger let's you know you've got the genuine article.

Code	Description	
GRSND-RMLN	Deluxe Black Cowgrain, Removable Thinsulate Foam Liner (Qty: 1 Pair)	38.20

Endura

Flame-resistant Rhovyl® and ESD carbon-blended liners will not melt, drip or form molten droplets, and therefore will not adhere to the skin in the event of flash fires. The full carbon filament in the built-in liner prevents static build-up, thereby minimizing the chance of sparks. With a resistance of 10.5 ohms, they are ideal for gas company workers. Besides being naturally non-flamable, Rhovyl resists mildew and other destructive biological agents and is easy care - machine washable and quick drying. It also wicks moisture away from hands, and insulates against both hot and cold temperatures. Qty: 1 pair.

Code	Description

North 7600 Full Mask

The 7600 Silicone Full Facepiece provides eye, face and repiratory protection. It offers exceptional comfort and performance. The dual flange silicone seal provides excellent fitting and the hard-coated polycarbonate lens provides over 200 degrees field of vision, protecting eyes from gases, vapours and particles. This scratch-resistant lens meets the ANSI standards for impact and penetration resistance. The 7600 Series offers top quality in air purifying respirators.

Code	Description	
FMR76-Large	Air Purifying Respirator 7600 Full Mask - Large	263.35
FMR76-Medium	Air Purifying Respirator 7600 Full Mask - Medium	263.35
FMR76-Small	Air Purifying Respirator 7600 Full Mask - Small	263.35

North 7700 Half Mask

The 7700 Half Mask Series excels in comfort and durability. It has a soft, non-allergenic silicone seal which provides excellent protection and fit. Due to its cradle suspension system, the facepiece seals evenly with no pressure points. The low profile does not interfere with the wearer's vision. There is low inhalation and exhalation resistance which makes breathing easier than other masks.

Code	Description	
FMR77-Large	Air Purifying Respirator 7700 Half Mask - Large	37.00
FMR77-Medium	Air Purifying Respirator 7700 Half Mask - Medium	37.00

MLY-1.8-SH	FPD29811/6 6ft Lanyard, Snap Hook	80.75

Anchorage Connectors

The third component of a personal fall arrest system is the Anchorage/Anchorage Connector. An anchorage, commonly referred to as a tie-off point, may be an I-beam, column, rebar, scaffolding, or other structural member. An anchorage connector is used to join the connecting device to the anchorage when a direct connection does not exist. It is important to select the proper anchorage/anchorage connector for ultimate safety. Anchorages and anchorage connectors must be easily accessible, capable of supporting 5,000 lbs. of force per worker, and they must be located high enough for a worker to avoid contact with a lower level should a fall occur. Miller offers two anchorage connectors that provides reliability with Miller quality: the Cross Arm Strap and the Beam Anchor.

Code	Description	
MMA-BA	Miller Beam Anchor	425.00
MMA-CAS	Miller Cross Arm Strap	65.00

Harnesses by Miller

Miller harnesses are designed for comfort. All Miller premium harnesses are rated to 400 lbs. (181.4kg) capacity. These harnesses come in one universal size.

Code	Description

Soft Foam Bandage

Cederroth Soft Foam Bandage is a new product that can be used as both a plaster and a bandage. The foam bandage is suitable for any kind of small wound in all hot, cold, wet and dry conditions and will stay in place in water. Cederroth Soft Foam Bandage is self-adhesive, so it does not contain any glue. This means that it will not stick to your skin or hair.

Code	Description	
FBFCF-BU	Cederroth Soft Foam Blue Bandage (2 rolls/box)	28.00
FBFCF-Regular	Cederroth Soft Foam Bandage (2 rolls/box)	23.00

Dressing Strip Rolls

Strip Bandage Dispenser

The Salvequick Dispenser and Salvequick bandages are a complete, easy to use system. The plasters are always available, ready to use. The refills are locked, which prevents waste. This Dispenser maintains high quality and is easy to use. When a plaster is pulled from the dispenser, one of its adhesive surfaces is exposed and it can be applied easily with one hand. The dispenser is refilled quickly and easily with a special key. Various refills are available. The transparent lid protects against dust.

Burnfree Burn Gels

This gel is ideal for all minor burns, including sunburns. It soothes, cools, and moistens the skin. Burnfree can also be used on scrapes, cuts, and small wounds to protect the area from infection.

Code	Description	
FBB-2oz	Burnfree Burn Gel 2oz Squeeze Bottle	6.80
FBB-4oz	Burnfree Burn Gel 4oz Squeeze Bottle	8.85
FBB-75ml	Burnfree Burn Gel 75ml Dispenser Can	13.90

Burnfree Burn Dressings

Burnfree sterile burn dressings can be used to reduce the pain and trauma from fires, flames, scalds, and chemical and electrical injuries. The dressings are made of soft, open-cell foam saturated with the water soluble Burnfree gel. They are light and easily transportable, and a single application is usually effective. The dressings have a foam carrier which allows complete delivery of gel to the burn. Burnfree dressings are non-adherent and the foam base will not shed threads, strands, or fibers that might become embedded in the wound. The smaller Burnfree dressings are ideal for hands and fingers, while the large dressings are big enough to treat a foot, arm, or leg.

Code	Description	
FBBD-10.0cm	Burnfree Burn Dressing (10 x 10cm)	6.75
FBBD-20.0cm	Burnfree Burn Dressing (20 x 20cm)	13.10

FBBD-5/15	Burnfree Burn Dressing (5 x 15cm)	6.30

Burn Relieving Gel

This gel is ideal for all minor burns, including sunburns. It soothes, cools, and moistens the skin. Burnfree can also be used on scrapes, cuts, and small wounds to protect the area from infection. Burnfree products are cooling, soothing, bacteriostatic, lidocaine-free, and completely water soluble.

Code	Description	
FBG-Q1000	1/8 oz. Burnfree Pain Relieving Gel (3.5g). 1000/Case	460.00
FBG-Q25	1/8 oz. Burnfree Pain Relieving Gel (3.5g) Box/25	15.60

Water-Jel Burn Dressings

Water-Jel Burn Dressings provide fast, one-step relief for emergency first aid for burns. The dressing stops burn progression and cools the skin, relieves pain and protects against airborne contamination. These dressings are made with a scientifically formulated cooling gel and utilize medical-grade nonwoven pads. They are non-adherent so they will not stick to burn injuries. Soaked in a water-based/water-soluble, bacteriostatic and biodegradable gel and sterilized to ensure a contamination-free atmosphere for emergency treatment of burns, Water-Jel dressings offer fast and effective burn treatment.

Code	Description

FACPR20-1L	Vitamin Rich Skin Lotion (1 litre)	125.60

Water Soluble Barrier Cream

pr88 is a water soluble skin protection cream, which is applied before work begins. It provides a non-greasy, non-sticky barrier against alcohol and carbon based substances like gasoline, diesel, oils, hydraulic fluids, creosote, fats, paint, thinners, tar, dyes resins, non-polar organic solvents, fiberglass, superglues, ink, graphite., epoxies, etc. Absorption of solvents and toxins by the skin is delayed and often prevented. pr88 will not wipe off the skin nor transfer to surfaces touched once it has properly set on the skin (after approx. 1 minute) and therefore not contaminate work pieces. It is non-toxic, hypoallergenic, 85% biodegradable, and can be safely applied over open wounds and over face, neck, and other body parts; dermatologically tested and found to be safe for over 25 years as a serious health and safety product.

Code	Description	
FACPR88-1.6L	Water Soluble Barrier Cream (1.6 litres)	57.20
FACPR88-100ml	Water Soluble Barrier Cream (100ml)	10.90
FACPR88-10L	Water Soluble Barrier Cream (10 litres)	351.00
FACPR88-1L	Water Soluble Barrier Cream (1 litre)	40.95

Water Resistant Barrier Cream

pr99 is a water resistant skin barrier lotion applied before work begins or as a treatment for very dry skin at any time. pr99 provides a barrier against water and other aqueous substances, such as soaps, detergents, coolants, chemicals, acids, bacteria, herbicides, pesticides, fertilizers, concrete, mortar, disinfectants, drilling and cutting emulsions, lye, tensides, wood preservatives, galvanic solutions, etc. pr99 sets in approximately 2 minutes after application and renders the skin essentially water repellent. pr99 exfoliates from the skin in3-4 hours.pr99 is non-toxic, safe and hypoallergenic, and may be safely applied to any body part. It has been dermatologically tested and found to be safe as a serious health and safety product.

Code	Description

Dry Hand Cream

prDry Hands is the innovative answer to the skin problems of those who:Wear occlusive protective gloves (latex, nitrile, etc) Wear protective work footwear (shoes, boots) Work in a damp or wet working area.prDry Hands is an aqueous solution of a combination of two active ingredients with skin firming and sweat reducing effect. The two ingredients complement one other in their effect.prDry Hands has no fragrances or preservatives and therefore offers protection for even the most sensitive skin types.

Code	Description	
FACPRD-100ml	Dry Hand Cream (100ml)	31.40
FACPRD-1L	Dry Hand Cream (1 litre)	300.30

Facial Barrier Cream

prFacial is a water-resistant, high grease content, viscous, white emulsion based on an exceptional skin friendly combination of good absorbtion and lipid working components. It is silicon-free, lightly perfumed and conserving. As a facial protection for personnel working with sprays, prFacial protection prevents colour/lacquer mist from sticking to the skin. Lacquer and cream can be removed with a wipe. It offers protection in wet and humid working areas. Also used for cleaning where high grease content is required (chapped, dry skin, cold protection cream). Comes in 325ml containers.

Code	Description

FACPRF	FACPRF	39.60

UV Barrier Cream

prUV is the first barrier cream to successfully make use of modern micro pigments of titanium oxide and zinc oxide. These micro-pigments offer extremely high factors in UV-filtration, reflection, and absorption (energy disbursement) over the entire spectrum of UVA, UVB, and UVC. Because of their small size, these particles are no longer visible but appear transparent, thus they are highly acceptable from a cosmetic point of view. The substances are also inorganic, and are considered dermatologically and toxicologically harmless. Older sun bloc preparations make extensive use of organic filter substances, which are now considered dermatologically questionable.prUVoffers a Light Protection Factor of DIN 20, which translates into a North American SPF 40. prUV is water resistant and will not come off the skin while swimming or perspiring. To remove use soap and water. Further skin friendly ingredients also found in pr99 make prUV an excellent skin conditioner and moisturizer. It is skin type neutral, hypoallergenic, and non toxic.

CPR Rescue Aid

CPR Prompt Aids are compact, portable units that prompt trained rescuers through the proper procedures and sequences of CPR in real time. They can be used as training aids and emergency response aids. These devices are especially important since the retention of CPR skills and knowledge among laypersons and professionals was identified as a major issue at the 1992 conference of the American Heart Association Emergency Cardiac Care committee. More recent studies have shown that retention of CPR instructions tends to deteriorate as early as 3 months after training, even among the highly trained, and especially for layperson rescuers who, unlike professionals, may never have been tested by a real emergency. Stress during an actual emergency can further debilitate the rescuer's memory. Our CPR Prompt Aids are designed to assist the rescuer during emergencies and high stress events.

Safety Products > Emergency Supplies > Lights > Heavy Duty Flashlights

UK2AAA Lights

This light is ideal for close inspections, night repairs or for navigating in the dark. The most unique feature of this light is the type of beam it projects. Rather than producing a bright center spot which fades quickly to dark, the eLED Penlight S projects a soft edged disk of even illumination. This is made possible by a compound lens optical system designed specially for the UK 2AAA eLED® series of lights. From a distance of 24 inches the beam is about 6-7 inch in diameter or about 16 degrees.

Code	Description	
EU2A-B	HP Xenon Lamp/Reflector	16.60
EU2A-LT	UK 2AAA Penlight	31.00
EU2A-LTS	UK 2AAA Penlight with Thumb Click Switch	34.20

EU4A-XS-Yellow	UK4AA Helmet Light. Xenon Tall Switch Yellow	61.80

Sunlight Flashlights

These flashlights combine quality with durability. The SL4 produces a narrow and penetrating beam for seeking out unique marine life found under ledges. It also works well attached to protective head gear in technical diving applications. The C4 has a unique dual lamp system allows you to switch between two different lamps underwater. Switch to a second lamp if the first burns out. The C8 becomes the light of choice for most diving situations. In remote locations where electricity is unavailable the C8 will run 4-4.5 hours on a set of batteries using the 13-watt lamp.

Code	Description	
EUSL-C4	Sunlight C4 Xenon Light	91.90
EUSL-C8	Sunlight Flashlight	114.90
EUSL-SL4E	Sunlight SL4 eLED Light	167.20
EUSL-SL4X	Sunlight SL4 Xenon Light	99.10

UK4AA Unilite Flashlight

This versatile flashlight consists of a rotating head which allows the user to focus on the area he/she is working on. Lay the UNILITE down and twist the light head to point at your work. Clip it to a pocket, safety harness, turnout or belt with its heavy duty nylon clip. For straight on illumination the right angle section can be removed. A stainless split ring and snap are included for attachment to clothing loops and button holes.

Safety Products > Eye Wash > Cederroth

Pocket Eye Wash

A pocket-size personal eye wash bottle that can be kept conveniently in your pocket or the holster that goes with it. This makes it available immediately in the event of an accident. This small, easy-to-use bottle with an ergonomic eye cup and a generous flow of fluid. Quick and easy to open. Cederroth Eye Wash is opened using one easy movement. Simply twist the bottle to open it! This Eye Wash consists of 8.3 fl. oz. (235 ml) sterile buffered isotonic sodium chloride solution without preservatives. For single use. The shelf life is 4.5 years. Eye Wash dimensions are 6.6 x 16 x 4.5 cm (2.6 x 6.4 x 1.8 in).

Code	Description	
FCREP-EW	Cederroth Eye Wash	23.90
FCREP-HS	Cederroth Eye Wash Holster	10.40

Eye Rinse

Cederroth Eye Rinse comes in small practical ampoules that contain sodium chloride solution to rinse dust and dirt out of your eyes. Contains physiological sodium chloride solution NaCl 0.9%. Sterile. For single use.The box consists of 12 units of 20 ml ampoules and are designed to fit into the First Aid Station.The dispenser consists of 10 units of 20ml ampoules and are designed to be placed on the wall.

Eye Wash Station

Cederroth Eye Wash Station has been designed to allow you to help out as quickly as possible. The station has space for two bottles which open automatically when you twist them out of their holders. The bottles are designed to allow you to rinse your eye with a good flow of liquid for around 1.5 minutes. They have the longest shelf-life on the market at 4.5 years. This unit is 29 x 56 x 12 cm (12 x 22 x 5 in).

Code	Description	
FCRES-Large	Cederroth Eye Wash Station	195.00

Eye Wash

The Cederroth Eye Wash consists of an easy-to-use bottle with an ergonomic eye cup and a generous flow of fluid. This unit is opened in one simple operation. Simply twist the bottle to open it! Cederroth Eye Wash can be positioned in several different ways, making it suitable for all workplaces. The Cederroth Wall Bracket is ideal for this. It is vital to start flushing within the first few seconds following an accident. The Cederroth Eye Wash provides a generous flow of fluid. The eye cup is shaped to channel the fluid to the eye without unnecessary waste while helping to keep the eye open. As well as diluting and flushing away the dangerous substance, Cederroth's buffered Eye Wash also has a neutralizing effect on splashes from alkalis and acids. The effect is in general stronger for alkalis than for acids. Non-buffered flushing solutions only dilute the acid/alkali and flush it away, which requires more fluid and prolongs the flushing time. The integrated dust cover keeps the eye cup clean. The dust cover also acts as an opening device.

Safety Products > Eye Wash > Eyewash Showers

Thermostatic Mixing Valves

Bradley Thermostatic Mixing Valves blend hot and cold water to a tepid flushing temperature (65º-95ºF). ANSI Standards require tepid water to assure the eyewash and drench shower do not subject the user to scalding or freezing water temperatures. Bradley valves feature an exclusive fixed cold-water bypass, which allows only cold water to flow through the valve in the event of loss or interruption of hot water supply or thermostat malfunction. These valves are pre-set at 85ºF, but can be adjusted to other temperature set points. Valves are available in a variety of options to accommodate various equipment applications. Click here to download the technical specifications.

Safety Products > Eye Wash > Opti-Klens

Opti-Klens Eyewash Fountains

The Opti-Klens eye/face wash fountains have been the leader in faucet mounted products for over 25 years and are an economical method of fulfilling your eye and face wash needs while remaining compliant with regulations. All Opti-Klens products are made of brass and cooper, chrome plated to match your faucets and for long life. All products have been tested by independent laboratories to confirm compliance with ANSI Standard Z358.1, and as such are accepted by OSHA as fulfilling their requirements for an emergency eye or eye and face wash. Note: For the Opti-Klens I and II to be fully compliant to ANSI Z358.1, the eliminator valve is required to ensure tepid water flow. Opti-Klens I & II Eyewash Fountains are low profile and easy to install with no plumbing required. The eliminator valve (sold separately) allows for the consistentflow of tepid water. These stations are an inexpensive form of full- time eyewash protection. The Opti-Klens 1M Eye/Face Wash Station is a wall mounted eye/face eyewash station that attaches to 1/2" water line for plumbed installation. It features a push paddle, chrome plated brass pipe line and ball valve, cast aluminum bracket, softened flow heads with dust covers, and a stainless steel bowl. All units meet the requirements of ANSI Z358-1. Opti-Klens I and II require the installation of the Eliminator Valve with the unit to be compliant.View Brochure

Metal Cabinet

This is a durable, wall mountable, white metal cabinet designed for the storage of eyewash and bottles. It comes complete with rubber gasket, wall mounting brackets, hinged lid, and carrying handle. The storage space allows for one 1L (32oz) empty eyewash bottle and one 1L (32oz) bottle of eyewash solution or Neutralite. A mirror is on the inside to view irritated eye or face. Bilingual instructions can be found on the outside of the cabinet.

Code	Description	
FESMC-1 litre	Metal Eyewash Cabinet with Mirror (includes 1 L Eyewash)	78.80
FESMC-Empty	Metal Eyewash Cabinet with Mirror (Empty)	48.95

Neutralite

Neutralte is a sterile solution that helps in neutralizing acid and alkaline chemical splashes. It is an effective buffering agent in the first aid treatment of chemical splashes.

Code	Description	
FESN-100ml	Neutralite (100ml)	4.13
FESN-1L	Neutralite (1L)	39.10
FESN-4L	Neutralite (4L)	78.20

Portable Eyewash Station

This eyewash station comes with 1 or 2 empty eyewash bottles with eye cup. It is made of high-impact plastic, this eyewash station is white, highly visible, and holds eyewash bottles. A mirror is included in order to view contaminated eye or face. Features 4 pre-drilled holes for easy mounting or relocation. Comes printed with bilingual instructions. Note: Eyewash solution must be purchased separately.

Code	Description	
FESP3-D-1L	Portable Dual Eyewash Station - Empty (1 litre)	43.90
FESP3-S-1L	Portable Single Eyewash Station - Empty (1 litre)	23.34

Chemical Burn Station

This chemical burn station comes complete with one or two 1L (32oz.) bottles of Neutralite solution. The station can be easily wall mounted in work areas where the potential of eye injuries and chemical splashes (acids, alkaline, and other solvents) exists. It is a must for chemical storage areas, battery recharging stations for tow motor trucks and other equipment, institutional kitchens, restaurants, hotels, swimming pools, and hockey rinks.

Code	Description

FESPC-S-1L	Chemical Burn Station (Single)	50.07

Safety Products > Eye Wash > Sperian

Defend 1100

A liquid concentrate formulated to inhibit the growth of harmful bacteria in self-contained eyewash stations. One 250ml (8 oz.) bottle will preserve 56-64L (14-16 gallons) of potable (tap) water. Once mixed with water, it must be changed at least once every 4 months (120 days). It is for use in Portastream II Model 200-46. The preservative has a shelf life of 3 years if unopened.

Code	Description	
FESD	FESD	18.10

Eyesaline Concentrate

Eyesaline® concentrate is designed for on-site preparation of a preserved, buffered saline solution. It is ideal for use in self-contained, gravity fed emergency eyewash stations. Mix with clean potable (tap) water at a ratio of 10 parts water to one part solution.

Code	Description	
FESE-2.07L	Eyesaline Concentrate (2.07L)	76.21
FESE-5.3L	Eyesaline Concentrate (5.3L)	104.45

Flash Flood Station

The Flash Flood® delivers Eyesaline® solution from a 4L (1 gallon) cartridge (included in the purchase of a eyewash station). When the cartridge is inserted in the base unit, the cartridge seal is broken and the Flash Flood® is ready to deliver eyewash solution for three minutes at a rate of 1.32L per minute. This unit can be mounted on the wall. Cartridge replacement is quick and easy. The Flash Flood delivery system offers immediate, hands-free eye flushing, and is portable to meet the needs of changing work-place hazards. Removing the pull strap easily activates the system, while dual nozzles provide flushing to both eyes simultaneously. When activated, Flash Flood delivers Eyesaline solution for three minutes.View Brochure

Pureflow 1000 Station

The Pure Flow 1000 is the answer to concerns about contaminated flushing solutions, eyewash maintenance costs, dependable effective fluid flow, and easy, immediate access. It delivers unequaled eyewash safety, reliability, and value. The patented system delivers purified, contaminant-free, and physiologically correct saline solution from factory-sealed cartridges. It features a fluid pressure balancing system that provides a constant fluid flow rate and stream height for the entire 15-minute flushing period required by ANSI Z358.1-2004. Pure Flow 1000 factory-sealed cartridges last up to 24 months,* at least four times longer than other primary self-contained eyewash devices. Pure Flow 1000 is available with standard or 100% sterile saline eyewash solution. The cartridge requires only 5 minutes to change and the cartridge remains sealed until activated. Eyewash flow exceeds .4gpm for 15 minute cycle and meets ANSI Z358.1 requirements. It is a portable unit and no plumbing is required. The bracket and sign are included. The unit has a built-in dust cover and the station captures own waste, so there is no mess to clean up. The unit is 76cm x 58.5cm x 76cm (30" x 23" x 30") and weighs 17.7kg (39lbs). *Cartridges must be purchased separately.View Brochure

Porta Stream Eyewash Stations

The Porta Stream emergency eyewash stations deliver solution at ambient temperatures and provide uninterrupted, hands-free flushing. The Porta Stream I delivers 6 minutes of uninterrupted, hands-free flushing - without costly plumbing. Completely portable, the lightweight design's gravityfed flow begins immediately when the nozzle pull strap is removed. Porta Stream I is supplied with 70 oz. (2.07L) of Eyesaline® Concentrate which, when mixed with tap water, provides 6 gallons (22.7L) of Eyesaline Solution. This portable unit may be mounted on a wall, mobile cart or mobile stand. The Porta Stream II offers versatile portability and 15-minutes of uninterrupted flushing — without costly plumbing. Porta Stream's simplicity of installation and operation has made it a popular choice. Self-contained, each model features a nozzle strap that is easily removed to activate flushing, leaving hands free to hold eyelids open. The Porta Stream III offer versatile portability and 15-minutes of uninterrupted flushing — without costly plumbing. Porta Stream's simplicity of installation and operation has made it an industry favorite. Self-contained, each model features a nozzle strap that is easily removed to activate flushing, leaving hands free to hold eyelids open. Porta Stream III is thermostatically controlled for indoor or outdoor use. The fluid-heating system makes it ideal for use between 72° and -32° F (22° to -36° C). Each portable unit may be mounted on a wall, mobile cart or mobile stand.Note:Porta Stream II and III fulfills ANSI Z358.1 requirements. The Eyesaline solution has a 6 month change/cleaning cycle.

Safety Products > Fire Products > Fire Blankets

Burnfree Fire Blanket

Burnfree blankets are designed for emergency and industrial use as first aid for burns while also providing protection from fire and smoke. Burnfree blankets can be used to reduce the pain and trauma of wounds from fires, flames, scalds, and chemical and electrical injuries. The blankets are made of pure virgin wool woven with a unique interlinking cell construction. The special construction, in conjunction with the wool fiber, allows the blanket to hold up to 14 times its weight of the Burnfree solution. They are packed in a durable, flexible barrel bag with sealable double zip openers or in a PVC pack with quick release fasteners. The bag's flexibility makes it comfortable to carry. It also has a handle strap to hang the bag from the shoulder or around the body.

Code	Description	
FBFB-.92/.75	Burnfree Fire Blanket 92 x 75cm (3 x 2.5ft)	143.80
FBFB-1.8/1.55	Burnfree Fire Blanket 1.8 x 1.55m (6 x 5ft)	319.25

FBFB-2.4/1.52	Burnfree Fire Blanket 2.4 x 1.52m (8 x 5ft)	458.55

Fire Blanket

This blanket, when draped over a fire, smothers the danger by starving the fire of oxygen. The blanket can also be used to wrap around a person whose clothes are on fire. It is suitable for use in a variety of different environments including kitchens, factories, offices, stores, schools, restaurants, hotels, boats, nursing homes, ships, laboratories, and many more.

HPRC Cases

This tough injection molded carrying case is designed with rigid reinforced walls to give maximum protection for even the most sensitive equipment. This case come in black, blue and red. The resin used gives excellent impact resistance. Lightweight with safe locking system, this case is resistent to extreme temperatures, sand, dust and corrosion. It is crushproof, watertight and able to adjust to pressure.

EID

Preparedness begins with training and extends beyond the classroom with this rugged, comprehensive, and interactive First Aid & CPR cognitive feedback tool. Just four minutes in a medical emergency can mean the difference between life and death. The Emergency Instruction Device (EID) is a life saving, affordable training device that allows rescuers to train anytime and decrease fear and panic.The EID is designed to effectively coach users on First Aid & CPR from start to finish. In the event of an emergency, this simple, easy-to-use touch pad gives directions in English or Spanish on how to respond quickly and accurately. Be prepared in the event of a sudden emergency with minimal first aid training or experience.The award-winning EID keeps rescuers focused on accepted first aid and CPR protocols in order to treat the injured person in a safe manner. The device speaks out loud and has visible instructions on the embedded LCD screen, asking questions about the extent of the injury. The yes/no buttons are used to answer. Depending on the severity of the situation, the EID continues to ask questions until it understands the situation and can accurately give instruction on how to proceed and further treat the injured person.

Bantex Cohesive

This cohesive gauze that can be used as a protective wrap for medical or industrial uses. It is safe for sensitive skin and will not adhere. It replaces use of adhesive tape, roller gauze, or stockinet. It is water resistant and comfortable (will not distort, slip, or loosen). It is easy and painless to remove and leaves no sticky residue. Ideal for protecting fingers and hands during industrial assembly work or providing support to joints and muscles.

Code	Description	
FGB-1.25/27	Bantex Cohesive Gauze, 1.25cm x 27m (24/Bag)	61.85
FGB-2.25/27	Bantex Cohesive Gauze, 2.5cm x 27m (12/Bag)	61.85
FGB-2/27	Bantex Cohesive Gauze, 2cm x 27m (16/Bag)	61.85
FGB-5/27	Bantex Cohesive Gauze, 5cm x 27m (6/Bag)	61.85

Conform

These sterile kling type bandages are self-adherent and lightweight, offering support and mild compression. They are suitable for retaining a sterile dressing pad. These bandages conform to all surfaces of the body and will not adhere to skin. The absorbent and breathable material allows for good moisture vapour and helps improve the healing process.

Code	Description	
FGCF-10/4.5	Conform Bandage, 10cm (4")	1.35
FGCF-15/4.5	Conform Bandage, 15cm (6")	1.75
FGCF-5.0/4.5	Conform Bandage, 5cm (2")	1.00
FGCF-7.5/4.5	Conform Bandage, 7.5cm (3")	1.15

Compress Pressure

Designed to help apply compression to an open wound to quickly stop bleeding, these compress pressure dressings feature a highly absorbent, non-adherent pad that will not stick to the skin surface or wound. Conforming stretch tails can be adjusted to increase or decrease compression to minimize blood flow and keep the casualty comfortable. These bandages are easy to apply and remove and are suitable for all first aid kits and stations.

Code	Description	
FGCP-10.0cm	Compress Bandage (10 x 10cm)	2.35

FGS-7.5cm	Gauze Sponges, 8 Ply, 7.5 x 7.5cm (200/Bag)	6.30

Surgilast Retainers

This tubular elastic dressing retainer is manufactured from a high quality blend of rayon and nylon. It stretches easily in all directions and holds dressings in place for improved wound care. It allows air to flow through to the wound and will not unravel. The dressing can be cut to accomodate most bandaging requirements and can be used whenever there is a need to keep a dressing in place. It is used by burn centers, emergency clinics, hospitals, and industrial health clinics.

Code	Description	
FGSL-Size 1.0	Surgilast Elastic Bandage Retainer, Size 1, 12.5cm x 23m	31.95
FGSL-Size 10.0	Surgilast Elastic Bandage Retainer, Size 10, 110cm x 23m	144.30
FGSL-Size 2.0	Surgilast Elastic Bandage Retainer, Size 2, 15cm x 23m	34.65

Safety Products > Gloves > Disposable > Nitrile

Sterile

Flexam® Sterile Nitrile exam gloves are ideal when you require a longer length and/or sterile glove for exam procedures. The unique qualities of this product will provide you with a sterile hand covering that is synthetic thus addressing the needs of the latex sensitive and clinically reactive individuals. These gloves have textured fingertips for improved grip, better puncture resistance than a comparable natural rubber latex exam gloves and are tested for use with Chemotherapy Agents and Lab Chemicals. They are 11.1" length for extra protection and come individually packaged in boxes of 50 gloves.

Code	Description	
GDN882-Large	Flexam Sterile Nitrile Gloves. Large	39.95
GDN882-Medium	Flexam Sterile Nitrile Gloves. Medium	39.95
GDN882-Small	Flexam Sterile Nitrile Gloves. Small	39.95
GDN882-XLarge	Flexam Sterile Nitrile Gloves. XLarge	39.95

Extra Thick

Extra thick nitrile gloves, deliver superior snag and puncture resistance, plus excellent flexibility and protection from a broad range of chemicals. Contains no natural rubber proteins that may cause allergies. Specifications and physical properties comply with ASTM D3578-95, EN455-1, EN455-2. Our Keep Kleen Nitrile® gloves are a Class 2 Medical Grade, and are Agriculture Canada (CFIA) Approved for Food Handling. These gloves are powder-free.

Code	Description

Heavy Duty Extra Long

We use a heavier weight PVC in these Torpedo Plus™ gloves. We start with a seamless-knit cotton 13-gauge shell and dip them in blue PVC over an ergonomically shaped hand form. We use only a premium, super-soft, flexible PVC formulation. All styles are CFIA approved for food handling.

Code	Description	
GRVSHL-Large	Large-Blue Heavy Duty Double Dip, Knit Cotton Liner, 23in w/Sleeve (Qty: 12 Pair)	90.10

Safety Products > Gloves > Reusable > Cleanroom

Polyurethane

The fabric in these patented gloves is polyurethane bonded to nylon knit. Soft and lint-free, these gloves resist solvents, are cleanroom compatible and have a double-folded cuff edge to ensure the lowest particulate counts. The glove is cut and sewn with a continuous silver strip running down the centre of the palm on the outside and back up through the inside to create a ground for the wearer. This unique feature is what sets this glove apart from others. By grounding the worker to the paint gun rather than insulating them from it, paint particles are drawn toward the object being painted rather than back onto the worker. Available in small, medium and large. Available as Class 100 cleanroom processed. Qty: 12 pairs.

Code	Description

GRS1-Medium-DTS2	String Cotton/Poly Glove PVC Dotted 2 Sides (Qty: 12 Pair) Medium	10.10

GRS1-Medium-HFG	String knit Cotton/Poly Glove, Open Fingers (Qty: 12 Pair) Medium	12.00
GRS1-Medium-HW	String Knit Cotton/Poly Glove, Heavy Weight (Qty: 12 Pair) Medium	10.20
GRS1-Medium-Polyco	String knit Cotton/Poly Glove, Cdn Made, CFIA Approved (Qty: 12 Pair) Medium	19.00
GRS1-Small-Cotton	String Knit 100% Cotton Glove, Natural Colour, CFIA Approved (Qty: 12 Pair) Small	9.60
GRS1-Small-DTS	String Cotton/Poly Glove PVC Dot Palm (Qty: 12 Pair) Small	8.10
GRS1-Small-DTS2	String Cotton/Poly Glove PVC Dotted 2 Sides (Qty: 12 Pair) Small	10.10
GRS1-Small-HFG	String knit Cotton/Poly Glove, Open Fingers (Qty: 12 Pair) Small	12.00
GRS1-Small-HW	String Knit Cotton/Poly Glove, Heavy Weight (Qty: 12 Pair) Small	10.20
GRS1-Small-Polycotto	String knit Cotton/Poly Glove, Cdn Made, CFIA Approved (Qty: 12 Pair) Small	19.00

Heavy Duty

The beauty of our new 'FAT' glove is the fact that it provides even more insulation, wear and cushioning than other heavyweights. Nylon is tough, long-wearing and won't get heavy when wet, meaning it will dry faster. You get the benefits of a thicker glove, without taking on more absorption.

Code	Description	
GRS2-Large	String knit Heavy Weight Nylon, Speckled Blue, CFIA Approved (Qty: 12 Pair) Large	9.60
GRS2-Medium	String knit Heavy Weight Nylon, Speckled Blue, CFIA Approved (Qty: 12 Pair) Medium	9.60
GRS2-Small	String knit Heavy Weight Nylon, Speckled Blue, CFIA Approved (Qty: 12 Pair) Small	9.60
GRS2-XLarge	String knit Heavy Weight Nylon, Speckled Blue, CFIA Approved (Qty: 12 Pair) XLarge	9.60

Safety Products > Gloves > Reusable > Cut > Dyneema > Fiberglass

ASTM 2-Hi Viz

This glove combines three really tough materials to create one amazingly cut-resistant glove that also happens to be incredibly comfortable. When high-tech fibres are added to composite yarns, the results are impressive. Fibreglass on its own is brittle, and while it scores well in some aspects of cut-resistance, does not in itself stand up well to direct cut. However, when combined with Dyneema®, brittleness is no longer an issue, as the fibreglass is now strengthened and supported by the surrounding material. Nylon added to this composite enhances toughness and wear, while the ergonomically curved hand and finger shape of the seamless knit shell provides all-day comfort. Palms are coated with tough polyurethane for grip and added durability in wet/dry or oily conditions. Dyneema® is a registered trademark of Royal DSM N.V. Qty: 1 pair.

Code	Description

GRD13F1 -Size 7	Size 7 Hi-Viz String Dyneema / Fiberglass, PU Palm Coated. Cut Level 2 (1 Pair)	17.50
GRD13F1 -Size 8	Size 8 Hi-Viz String Dyneema / Fiberglass, PU Palm Coated. Cut Level 2 (1 Pair)	17.50
GRD13F1 -Size 9	Size 9 Hi-Viz String Dyneema / Fiberglass, PU Palm Coated. Cut Level 2 (1 Pair)	17.50

ASTM 4-Dotted Palm

These highly specialized gloves were designed with the pulp and paper industry in mind. Workers there need a high level of cut protection for both hands and wrists, as well as good dexterity, and solid grip in just the right places. To that end, we have created a glove with a six-inch knit wrist, an impressive cut-level of CE 5, and PVC dots on the palm side of the thumb, index and middle fingers, as well as half the palm. By combining a high-tech fiber like Dyneema® with fiberglass, we have achieved far more than just the sum of the parts. Fiberglass on its own is brittle and breaks down under direct force. However, when combined with Dyneema®, brittleness is no longer an issue, as the fiberglass is now strengthened and supported by the surrounding material. PVC dots on the palm side of just two fingers, thumb and half the palm gives you the best of both worlds: you can hang onto tools while working, but grip is not in areas where you don't need it, or worse yet, where it could cause an accident. Combined with the slickness of the Dyneema® knit surface, safety is increased because the baby-finger side of your hand will not drag along paper rolls or other surfaces. Gloves feature built-in ergonomic shaping to enhance the all-day comfort of the Dyneema® knit. And, while they are specific to the pulp and paper industry, these gloves are also great for those working with glass, metal and other extreme cut hazards. CFIA approved for food handling. Dyneema® is a registered trademark of Royal DSM N.V. Qty: 1 pair.

Code	Description	
GRD13F3 -Large	Large String Dyneema/Fiberglass glove, PVC 1/2 Palm dotted, 6in cuff. Cut Level 4 (1 Pair)	26.60

GRD13F3 -XLarge	Large String Dyneema/Fiberglass glove, PVC 1/2 Palm dotted, 6in cuff. Cut Level 4 (1 Pair)	26.60

ASTM 4-High Abrasion

Spun yarn is a blend of Dyneema®, fiberglass, nylon and cotton for the ultimate in cut/abrasion protection, durability, and even increased grip. Our unique spinning process combines four fibers for a yarn that solves the problem of that slippery feel inherent in Dyneema® yarn. Cut resistance is an outstanding ASTM level four, and abrasion resistance is high as well: gloves endured 1122 cycles on the Taber machine before wear through. When abrasion resistance is this high, cut resistance is boosted considerably over the lifespan of the glove, since less wear-through from abrasion preserves the overall fiber for longer-term cut protection. Salt-and-pepper color hides dirt and grime for longer wear and greater cost savings. Dyneema® is a registered trademark of Royal DSM N.V. Qty: 1 pair.

Safety Products > Gloves > Reusable > Cut > Dyneema > Nitrile

ASTM 1-Fully Coated

Superior Touch™ gloves made with Dyneema® feature a full nitrile coating, for complete protection from oils and solvents. Dyneema®, is fifteen-times stronger than steel on an equal-weight basis, and is a lint-free, continuous-filament yarn. Gloves scored an ASTM cut-level 1/ CE 3 rating, with excellent abrasion resistance as well. And, because the entire glove is silicone free, they are an excellent choice for automotive workers.Dyneema® is a registered trademark of Royal DSM Group N.V. Qty: 1 pair.

Code	Description	
GRD13N1 -Size 10	Size 10 String knit Dyneema, Fully Coated Nitrile, Knit Wrist. Cut Level 1 (1 Pair).	16.40
GRD13N1 -Size 7	Size 7 String knit Dyneema, Fully Coated Nitrile, Knit Wrist. Cut Level 1 (1 Pair)	16.40
GRD13N1 -Size 8	Size 8 String knit Dyneema, Fully Coated Nitrile, Knit Wrist. Cut Level 1 (1 Pair).	16.40
GRD13N1 -Size 9	Size 9 String knit Dyneema, Fully Coated Nitrile, Knit Wrist. Cut Level 1 (1 Pair).	16.40

ASTM 2-Palm Coated

Dyneema is 15 times stronger than steel on an equal weight basis and twice as strong as Kevlar. It is also a lint free, continuous filament yarn. With their high coefficient of friction Nitrile palm coating and glove body with Dyneema, these gloves give an unparalleled cut resistance for a glove of such high dexterity and flexibility. A good choice for handling oily sharp steel, glass or circuit boards, especially when lint and particulate contamination is a concern.Dyneema is a registered trademark of Royal DSM N.V. Qty: 1 pair.

ASTM 2-Lined

FUSION™ gloves feature all-in-one cut and chemical protection. Made with Dyneema®, they guard against the dual hazards of cut and chemical exposure to replace the two-glove system of the past. Our newest version features a nitrile layer. Nitrile rubber is a co-polymer of acrylonitrile and butadiene that offers excellent physical-hazard resistance to punctures, cuts, snags and abrasion. It is not flame-resistant. It also has considerable resistance to oils, fuels, and certain organic solvents. The knit shell made with Dyneema® forms the exterior layer, and is bonded to an ergonomically shaped nitrile glove, providing increased wet/dry grip. On the inside, seamless-knit nylon liner provides softness and long wear. Gloves are perfect for applications like the food industry because they can be sterilized for reuse; both Dyneema® and PVC withstand bleach, while gloves are fully launderable at temperaturesunder 250°F.Dyneema® is a registered trademark of Royal DSM N.V. Qty: 1 pair.

ASTM1-Dyneema Blend

The physical properties of Dyneema® fibre produce durable cut resistant gloves that provide excellent dexterity and sensitivity without sacrificing comfort. The base polymer of Dyneema® is Ultra High Molecular Weight (UHMW) polyethylene. In the manufacture of the fibre, the long chains of polyethylene molecules are oriented in a crystalline arrangement. This gives Dyneema® its' extraordinary strength. In fact, pound for pound, Dyneema® is 15 times stronger than steel. The low co-efficient of friction of Dyneema® (or in simpler terms, the slickness of the fibre,) allows the sharp knife or object to slide across the surface of the glove, minimizing damage to the fibre. So the slickness and the strength of the fibre help protect against abrasive and slicing cuts. Plus the highly oriented molecules of the Dyneema® fibre do an efficient job of dissipating impact cuts. Although gloves made with Dyneema® are an excellent choice for cut-resistance applications, they are not recommended for use around heat, as Dyneema® will melt at 270°F (130°C). CFIA approved for food handling.Dyneema® is a registered trademark of Royal DSM Group N.V. Qty: Single glove.

ASTM 3-Palm Coated

Cut-resistant 13-gauge knit is highly dextrous yet provides stellar cut protection. Composite blended Kevlar® fiber provides ASTM level 3 cut protection – 1066 grams, yet is highly dexterous. A layer of tough nitrile on the palms adds puncture resistance, abrasion resistance and a good grip. Our seamless-knit shell is ergonomically-designed with a curved hand and finger shape for unsurpassed comfort and dexterity. Dipped in nitrile while on a hand mold for a true fit. And because the back of the hand is uncoated, flexibility and breathability are increased.Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.

ASTM 4-Tire Core

The latest gloves in our Emerald CX lineup are made with our own engineered composite blend of four high-performance technical materials: Kevlar® for cut-resistance, tire-core nylon for abrasion, stainless steel for incredible strength and fiberglass for even more cut resistance. All that in a string knit with great dexterity, snug fit and great touch sensitivity.Engineered so that the most abrasion-resistant yarns are on the outer face to effectively extend the wear of the glove, we've also built in our own 'wear-extend' thumb/index-finger reinforcement, which far outwears our competitor's versions. We also go beyond just wrapping Kevlar® yarn around the 7-micron diameter fiberglass – a diameter that will not cause skin irritation. We entangle and felt the Kevlar® fiber - during the Kevlar® spinning process - around the fiberglass core to eliminate any fiberglass exposure to the wearer's hands.Very often with composite-knit gloves, distribution of the different fibers is uneven, resulting in equally uneven protection across the surface of the glove. What makes our gloves unique however is the fact that the fibers throughout every square centimeter of knit are consistent on both the inside and outside surfaces, across the entire glove. Correspondingly, cut and abrasion protection is perfectly even, and is another factor behind the longevity of the glove.Great launder-ability means the SCX5 keeps reporting back for duty wash after wash. High cut protection, high abrasion resistance, great wash-ability, great dexterity, and untouchable value: five great reasons to try the SCX5.Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.

Kevlar

Two great features come together in one versatile glove. Our Dexterity™ LX gloves combine the seamless comfort of a string knit glove with a puncture-resistant latex coating. These cut-resistant Kevlar gloves have a unique, wrinkle-grip latex, applied to the glove over an ergonomic hand form. These gloves deliver excellent wet/dry grip with improved comfort and dexterity. Seamless comfort that is shaped to your hand, combined with a dependable grip, make Dexterity™ LX a great choice for construction, material handling, masonry work, handling glass, automotive work and the forestry industry. These gloves come with a Kevlar® shell, are 3/4 back coated and have a ASTM cut-level 2/CE level 3. Sold by the pair.

GRB-XLarge	Dexterity LX Palm Coated Gloves (1 pair). XLarge.	17.30

Safety Products > Gloves > Reusable > Cut > Kevlar > Leather

ASTM 2-Split Leather

Our 'Action' leather gloves have become the industry standard for heavy-duty cut resistance and durability. All models combine our own abrasion-resistant Tri-tan side-split leather (except the grain leather version SKGLP) with the excellent comfort and cut resistance of a seamless-knit Kevlar® glove. And as an added benefit, Kevlar® will not melt or drip around heat and open flame, increasing the range of applications. Fingers of the leather palms extend around the sides. This is one of the greatest wear areas, as seams tend to rub and annoy, often coming apart between the fingers. Our wrap-around style increases protection and comfort; extends glove life; and greatly improves launder-ability. Complete with full leather thumb, palms are attached to the knit shell with Kevlar® thread for greater durability.Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company

ASTM 4-Split Leather

The best thing about our Emerald CX gloves is not their exceptional cut resistance. The best thing is that they don't feel like highly cut resistance gloves. You can't tell your wearing a quarter mile of steel on your hand. You can't tell these gloves will stop a brand new razor blade slashed with at least 1200 grams of force, for our lightest version to over 3000 grams for our Nitrile version (SCXNT) in lab trials. Compare that to a heavy weight leather glove, which cuts at under 150 grams. Besides stellar cut resistance, very high abrasion resistance and great comfort.Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.

Safety Products > Gloves > Reusable > Cut > Kevlar > Nitrile

ASTM 5-Steel Mesh

Emerald CX is Superior Glove's engineered blend of super-strong materials, combining some of the strongest fibers known to man: stainless steel, Kevlar® and stainless steel mesh. Besides their cut-resistance, the best thing about these gloves is that they don't feel like highly cut-resistant gloves, which is amazing when you consider that you're wearing a quarter mile of steel on your hands. This model features a fine, highly flexible, cut-resistant mesh layer between the glove body and the nitrile palm coating. This layer is barely noticeable, yet it withstood 3425 grams (palm) of force in lab trials.Compare that to a heavyweight leather glove, which cuts at under 150 grams. In addition to stellar cut resistance, high abrasion resistance and exceptional comfort, Emerald CX is where value meets performance; you would expect to pay a lot more for a glove with such impressive stats. Test them in your own demanding applications!Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.

Safety Products > Gloves > Reusable > Cut > Kevlar > Stainless Steel

ASTM 2-Palm Coated

New from Superior's Emerald CX lineup: Emerald CX Lite…a custom-engineered blend that combines the lightweight ease and strength of nylon with multi-strand stainless-steel wire to deliver triple the cut resistance of comparable glass/nylon blends and yet half the cost of comparable cut-resistant styles.With their 3-¾" snug knit wrists, these gloves offer stay-in-place comfort on top of stellar wrist protection. A grey PU palm coating increases your grip in oily/wet situations, not to mention the excellent dry grip it provides. This good grip is not sticky, and will not shed. It also boosts puncture resistance. Two ends of fine stainless-steel wire in the knit provide ASTM level-2 cut protection, based on a cut resistance of 700 grams. Wire cannot be felt against the hand since the inside face is knit with 100% nylon for a smooth, comfortable feel. The combination of soft-yet-strong nylon and the strength of steel makes these gloves a comfortable and economical choice for cut protection, at approximately half the cost of comparable gloves offering level 2 cut resistance. A good choice for handling sharp steel, glass or circuit boards, especially where lint and particulate contamination is a concern.

GRK13SS1 -Size 9	Black String 13ga Nylon / Stainless Steel, Polyurethane Palm Coated. Cut Level 2 -Size 9	5.50

ASTM 5-Dotted

These highly cut-resistant composite gloves are specialized, with features like an extra-long knit wrist, and a unique dotting pattern that leaves part of your hand free of grip - two critical aspects of protection against hazard in the pulp and paper industry. Knit from a tough-as-nails blend of Dyneema®, Kevlar® and steel, they have the highest level of cut protection, (ASTM 5) yet are dexterous and comfortable – something that can only be achieved through the blending of so many high-tech fibers. Longer knit wrist (six-inch) provides critical protection in the wrist/forearm area. Clear PVC dots are strategically placed so you can hang onto tools while working, but grip is not in areas where you don't need it - or worse yet - where it could cause an accident. The baby-finger side of your hand will not drag along paper rolls or other surfaces, since the pinkie and one third of the palm are undotted.Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.Dyneema® is a registered trademark of Royal DSM N.V.

Safety Products > Gloves > Reusable > Cut > Kevlar > String Knit

ASTM 1-Kevlar

Kevlar® is considered the most important man-made fiber discovery since nylon. No other fiber has its unique combination of properties. It provides excellent protection against both cutting hazards and burn hazards, while being lightweight and comfortable. Kevlar® will not melt or drip on contact with open flame. Superior manufactures a variety of Kevlar® string knit gloves to cover a range of needs. 13-gauge string knit that offers excellent cut and slash resistance, making this glove ideal for handling metal stampings, glass and other sharp-edged materials while providing seamless comfort and dexterity. Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.

GR378D -Small-W	Small-Black DeerGrain Glove, Forchettes, Thinsulate Lined Ladies (Qty: 1 Pair)	36.80

Goatskin Fingerless

Goatskin is often referred to as nature's strongest leather. It has very high tensile-strength and abrasion-resistance properties, but has excellent softness and is lightweight. Because of this high strength-to-weight ratio, our Endura® Goatskin gloves are much tougher and more durable than their suppleness leads you to think. Qty: 12 pairs.

Code	Description	
GR378F -Regular	GR378F -Regular	121.00

Goatskin

Goatskin is often referred to as nature's strongest leather. It has very high tensile-strength and abrasion-resistant properties, but has excellent softness and is lightweight. Because of this high strength-to-weight ratio, our Endura® Goatskin all-leather drivers are much tougher and more durable than their suppleness leads you to think. Keystone thumb for extra durability. Great for handling building materials, assembly work, farming, municipal work, utilities and metal fabrication. Qty: 12 pairs.

Code	Description	
GR378G-Large-DL	Large-Grain Goatskin Driver, Keystone Thumb, Unlined (Qty: 12 Pair)	97.30

Winter

These fleece lined drivers gloves are made with premium grade cowhide leather.These gloves providedurability and dexterity, water and oil repellency. They have a smooth finish and are ideal for warehouse work or for operators of construction and farm equipment in colder temperatures during the winter season. They come in quantities of 12 pairs.

Code	Description	
GRDL-Large	Winter Driver Gloves (Qty: 12 pairs) Large	175.00
GRDL-Medium	Winter Driver Gloves (Qty: 12 pairs) Medium	175.00

Safety Products > Gloves > Reusable > Fitters

Pigskin

Endura® fitters gloves stand up to heavy-duty rugged wear. These gloves have the added feature of an outer elastic back, so when not being worn, you can hang them off your belt or any other place that's handy. They provide excellent protection from cuts, scrapes and abrasions because of the smooth top grain cowhide from which they are made. This also gives them excellent dexterity and durability, as well as oil and water resistance. Elastic backs also ensure a snug fit. Glove is palm-lined with an absorbent cotton liner. Qty: 12 pairs.

Code	Description	
GR76P -BOAL	Grain Pigskin Fitters, Fully BOA Lined, Safety Cuff (Qty: 12 Pair)	62.60
GR76P -FLL	Grain Pigskin Fitters, Fleece Lined, Safety Cuff (Qty: 12 Pair)	72.50

Kevlar

Superior's revolutionary new heat-resistant gloves bring together three high-performance materials in one high-functioning glove. In fact, heat resistance used to mean you had to wear a mitt to get the kind of protection you needed. Not anymore. With Superior SilaChlor®, you can get all that in a glove instead of a mitt, and more. You get significantly better dexterity and grip with these gloves, making it safer when handling hot objects. Gloves are a combination of Kevlar®, SilaChlor® and Temperbloc®. All materials are rated for high heat, and both Kevlar® and Temperbloc® withstand open flame and will not melt or drip on exposure. Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.

String Knit

Kevlar® fiber is renowned for its incredible heat-resistant properties. It will not melt or drip when exposed to open flame, making it the material of choice for high-heat applications. Carbon fiber is the same, and even exceeds Kevlar® when it comes to direct flame. So our new CoolGrip® string-knit gloves featuring a 50/50 blend of each are a heat-resistant miracle. The presence of carbon fiber allows the gloves to withstand extreme open-flame exposure without charring, burning or cracking. Neither Kevlar® nor carbon will support combustion. A 100% wool knit terry liner traps air for added insulation. This glove-within-a-glove design provides exceptionally high heat holdout, yet is comfortable and dexterous. Gloves are comfortable and allow a full range of hand motion during tasks involving thermal contact. Available in two wrist lengths: regular, and extended, for greater forearm protection.The heat-resistant revolution is here, with gloves that offer full heat protection and unprecedented dexterity.Kevlar® is a registered trademark of E.I. du Pont de Nemours and CompanyCoolGrip® is a registered trademark of Superior Glove Works Ltd.

Safety Products > Gloves > Reusable > Leather

Cowgrain Mitt

Cowgrain is abrasion resistant and offers good water repellency. Thick, acrylic pile lining and elastic at the wrist keeps the warmth in and the cold air and snow out. Metal clips keep mitts paired up when not in use. Note: Mitts are warmer than gloves in applications where dexterity is not critical to the task, such as freezer work or general outdoor maintenance. Qty: 12 pairs.

Code	Description

Palm Coated

Two layers of unique, textured microfinish latex, applied to a polyester knit glove over an ergonomic hand form, delivers excellent wet/dry grip with improved comfort and dexterity. Fine-gauge polyester knit is really lightweight and breathable, wicking moisture away from hands, while the high-viz lime-green color at the back of the hand increases safety. Seamless comfort that is shaped to your hand, combined with a dependable grip, make Dexterity™ LX a great choice for construction, material handling, masonry work, handling glass, automotive work and the forestry industry.

Safety Products > Gloves > Reusable > Palm-Coated > Polyurethane

Static

Polyurethane palm coated, Nylon/Carbon work gloves. The carbon filament that runs throughout the glove body reduces static build-up on the glove surface for improved performance in electronic applications. These gloves help protect the product from harmful static electricity and are suited for assembling semiconductors, handling compact discs, and handling any electronic products susceptible to electro-static discharge damage.

Nylon

Superior-Touch polyurethane gloves give unparalleled touch sensitivity and dexterity. The non-linting filament nylon, seamless knit shell combined with the low particulate shedding properties of the polyurethane coating makes this glove suitable for fine assembly work in industries where product contamination is an issue. Many workers who previously had to work barehanded for a good sense of touch and had to put up with hand nicks and cuts, now work safer and more productively wearing Superior-Touch gloves. CFIA approved for food handling.

Bag Valve Mask

BVM Resuscitators (Bag Valve Masks) are essential to providing treatment to casualties of medical emergencies such as cardiac arrest. They are important not only in hospitals but also for emergency teams and in First Aid Rooms.

Code	Description	
FAAB-A-D	Resuscitator ADULT Mask, Oxygen Reservoir System, & O2 Tubing. W/POP-OFF	32.50
FAAB-A-R	Adult Silicone Resuscitator c/w Mask, Oxygen Reservoir System, & O2 Tubing.	110.50
FAAB-C-D	Resuscitator CHILD Mask, Oxygen Reservoir System, & 02 Tubing. W/POP-OFF	32.50

FAAB-C-R	Child Silicone Resuscitator c/w Mask, Oxygen Reservoir System, & O2 Tubing.	110.50
FAAB-I-D	Resuscitator INFANT Mask, Oxygen Reservoir System, & O2 Tubing.	32.50
FAAB-I-R	Infant Silicone Resuscitator c/w Mask, Oxygen Reservoir System, & O2 Tubing.	110.50

Oro-Pharyngeal Airways

Oro-Pharyngeal Airways are used to maintain a patient's open airway. They prevent the tongue from covering the epiglottis. Oropharyngeal airways come in a variety of sizes, from infant to adult, and are used mostly in a pre-hospital setting. Set of 8 airways.

Glucose Powder

Our Glucose Powder (454g) is a natural source product which is made in Canada.

Code	Description	
FRGL-500G	Glucose Powder (454g)	11.25

Examination Stool

This revolving examination stool has an easy-to-operate gas lift cylinder with dual wheel casters and a durable casing. The extra-wide seat diameter with comfortable vinyl padding.Suitable for use on floors and carpet and ideal for first aid rooms.The height is adjustable from 41.3 cm to 54.6 cm (16-1/4" to 21-1/2"). The seat specifications are 30 cm (11-3/4") in diameter and 9 cm (3-1/2") in thickness.

Code	Description	
FSES-STD	Examination Stool with Gas Lift	225.00

Wheelchair

With fixed arms, swing away footrests and an 18" wide seat, thisAMG wheelchair exceeds institutional standards of quality. It features touch points which are easy to both clean and disinfect. It's streamline design along with mag wheels combine to make it lighter and more durable. The wheelchair features dual axle positions that allow for varying seat-to-floor heights, a heavy-duty chrome-plated steel frame, solid snap-on tires, adjustable brakes, sealed bearing assemblies, padded armrests, and flame-retardant black naugahyde upholstery.

Code	Description	
FWC-CP	Airgo® Procare IC Wheelchair with Fixed Arms and Swing-Away Footrests, 18 in. wide seat	495.00

Medicine Cup

Our graduated medicine cup is made of stainless steel for durability. It holds 2oz (59ml) of solution. The measurements are 2" (5.1 cm) in diameter and 1 3/4" (4.45 cm) in height.

Code	Description	
GMG-R	Graduated Medicine Cup (2 oz or 59 ml). Stainless Steel. Diameter: 2" (5.1 cm). Height: 1 3/4" (4.45 cm)	16.90

Aneroid Sphygmomanometer

This adult size blood pressure unit comes complete with a 300mm aneroid gauge, velcro cuff, and latex inflation system. It is packaged in a vinyl, leatherette style carrying case. Available in adult and child sizes.

Code	Description	
MSBP-A	Blood Pressure Cuff (Adult)	84.50
MSBP-C	Blood Pressure Cuff (Child)	46.75

Disposable Scalpels

Disposable scalpels come complete with stainless steel blade and are individually packaged. They come in 2 sizes (Size 10 and Size 11) and are packaged in boxes of 10 units.

Code	Description	
MSS-Size 10	Disposable Scalpels. Size 10 (10/Box)	23.30
MSS-Size 11	Disposable Scalpels. Size 11 (10/Box)	23.30

Stethoscope

This general purpose stethoscope comes complete with chest pipe, tubing, and binaurals. It offers a wide accoustic range and adjusts easily for comfort. It comes with either a single or dual head.

Code	Description	
MSST-1H	Stethoscope (Single Head)	24.75
MSST-2H	Stethoscope (Dual Head)	25.95

Thermometer

These thermometers are suitable for all first aid rooms, testing laboratories, clinics, and schools. The Oral and Rectal thermometers are in both Celsius and Fahrenheit. The Oral Digital thermometers are available in Celsius or Fahrenheit.

Code	Description	
MST-DCO	Digital Celsius Oral Thermometer	19.90
MST-DFO	Digital Fahrenheit Oral Thermometer	19.90
MST-MO	Celsius and Fahrenheit Oral Thermometer	1.80
MST-MR	Celsius and Fahrenheit Rectal Thermometer	1.80

Safety Products > Oxygen > Oxygen Kits

Emergency O2 Kit

The Emergency O2 Kitis the ideal kit for EMTs or any trained professionals. It contains all of the essential items required in an emergency situation.

Code	Description	
FM03	FM03	350.00

Crash Cart Kit

The Crash Cart Kit is designed for internal use in emergency situations. It is ideal for care facilities.

Code	Description	
FMO2	FMO2	375.00

First Response Kit

The EMS Pro Kit is a high level kit in a durable soft clamshell carrying case. These kits are designed for professional rescuers in a variety of emergency situations in many environments such as ambulances, fire departments, police stations, correctional facilities, doctors' offices, medical clinics, rehabilitation centres, sports arenas, recreation centres, senior citizens' homes and camp grounds and parks.

Code	Description	
FMO4-FRC	Replacement Clamshell Carrying Bag	195.00
FMO4-FRK	First Response Kit. " D" CYLINDER with oxygen fill. Clamshell Carrying bag	475.00

Oxygen Cylinders

Our oxygen cylinders come in the most common sizes and made of durable aluminum. These cylinders do not come with oxygen fill.

Code	Description	
FMOC-No O2-C Cylinc	Aluminum "C" Cylinder 9.0 Cu.Ft./ 255 Liters	99.00
FMOC-No O2-D Cylinc	Aluminum "D" Cylinder 15.0 Cu.Ft./ 425 Liters	109.95
FMOC-No O2-E Cylinc	Aluminum "E" Cylinder 24.0 Cu.Ft./ 680 Liters	119.95
FMOC-No O2-Jumbo I	Aluminum Jumbo "D" Cylinder 22.0 Cu.Ft./ 623 Liters with O2 Fill	229.95
FMOC-No O2-M Cylinc	Aluminum "M" Cylinder 122.0 Cu.Ft./ 3455 Liters	659.95
FMOC-O2-C Cylinder	Aluminum "C" Cylinder 9.0 Cu.Ft./ 255 Liters with O2 Fill	140.95
FMOC-O2-D Cylinder	Aluminum "D" Cylinder 15.0 Cu.Ft./ 425 Liters with O2 Fill	149.95
FMOC-O2-E Cylinder	Aluminum "E" Cylinder 24.0 Cu.Ft./ 680 Liters with O2 Fill	160.95
FMOC-O2-Jumbo D	Aluminum Jumbo "D" Cylinder 22.0 Cu.Ft./ 623 Liters	179.95

FMOC-O2-M Cylinder	Aluminum "M" Cylinder 122.0 Cu.Ft./ 3455 Liters with O2 Fill	729.95

Regulators

Our oxygen regulator attaches to oxygen supply systems, such as oxygen kits and provides a workable low-pressure gas stream from which breathing apparatus can be safely operated.

Code	Description	
FMOR-0-15	Brass/Aluminum Adjustable (0-15 Lpm) Oxygen Therapy Regulator.	90.10
FMOR-0-25	Brass/Aluminum Adjustable (0-25 Lpm) Oxygen Therapy Regulator	90.10
FMOR-0-8	Brass/Aluminum Adjustable (0-8 Lpm) Oxygen Therapy Regulator.	90.10
FMOR-Gasket	Post Valve Gasket Bodoc Neoprene (Qty: 10)	30.90

Safety Products > Oxygen > Resuscitators/O2 Masks

High Concentration Non-Rebreather

The high concentration elongated non-rebreather mask comes in a soft anatomical form and is ideal for long term patients. This transparent mask is available with the 7 Foot (2.1 M) Sure-Flow Tubing. Comes in case quantities.

Code	Description	
FAOHN-A-FT	Adult Total Non- Rebreathing Mask with FILTER and 7 Foot (2.1 M) Sure-Flow Tubing. (Qty: 25)	162.50
FAOHN-A-VT	Adult Total Non- Rebreathing Mask with 2 Side Valves and 7 Foot (2.1 M) Sure-Flow Tubing. (Qty: 50)	156.00
FAOHN-P-FT	Pediatric Total Non-Rebreathing Mask with FILTER and 7 Foot (2.1 M) Sure-Flow Tubing. (Qty: 25)	175.50
FAOHN-P-VT	Pediatric Total Non-Rebreathing Mask with 2 Side Valves and 7 Foot (2.1 M) Sure-Flow Tubing. (Qty: 50)	162.50

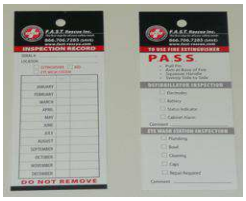
Medium Concentration Elongated Mask

The medium concentration elongated mask comes either with the mask only or with a 7 Foot (2.1 M) Sure-Flow Tubing. Case of 50 units.

Code	Description	
FAOM-A-Mask	Adult Medium Concentration Mask only. (Qty:50)	84.50
FAOM-A-Mask & Tube	Adult Medium Concentration Mask with 7 Foot (2.1 M) Sure-Flow Tubing. (Qty:50)	123.50
FAOM-I-Mask & Tube	INFANT Medium Concentration Mask with 7 Foot (2.1 M) Sure-Flow Tubing. (Qty:50)	227.50
FAOM-P-Mask	Pediatric Medium Concentration Mask only. (Qty:50)	84.50
FAOM-P-Mask & Tube	Pediatric Medium Concentration Mask with 7 Foot (2.1 M) Sure-Flow Tubing. (Qty:50)	123.50

Safety Products > Signs and Tags

Safety Tags



F.A.S.T. Rescue's inspection tags are designed to ensure that companies keep track of the inspections completed on their First Aid Kits, First Aid Rooms, defibrillators and fire extinguisher. These all in one inspection tags are sold in quantities of 100 tags.

Code	Description	
FBAS-INS	Inspection Tags (Qty: 50)	35.00

Danger Sign

These OSHA Dangersigns are in bright red and black on a white background. They alertworkers to a variety of dangerous areas and situations. Availablewith a variety of messages, these signs are durable and can be usedeither indoors or outdoors. They are available in 3 types:Aluminum signs are flat and madeof high quality aluminum. They are available in a regular size (10x 14"/25 x 35cm) or a large size (14 x 20"/35 x 50cm).Plastic signs are flat and made ofdurable, high-impact styrene. They are available in a regular size(10 x 14"/25 x 35cm) or a large size (14 x 20"/35 x 50cm).Vinyl adhesive signs made with adurable outdoor rated material. They are available in one size (10 x14"/25 x 35cm) and come with an adhesive backing. For maximumdurability, these signs should be adhered to a flat, non-poroussurface with a flat finish.

Cocoon

he American Heart Associations (AHA) Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care issued 2005 and the International Liaison Committee on Resuscitation (ILCOR) issued 2003 both recommend the inducement of hypothermia in the treatment of cardiac arrest and spinal cord victims.“The Cocoon” now offers this additional benefit to help you meet the AHA and ILCOR Guidelines to more effectively treat and care for these critical patients.“The Cocoon” is the only product available as an effective per hospital product “Hypothermic Device” that will realistically allow EMS providers the ability to treat cardiac arrest and spinal cord injuries with the inducement of hypothermia as recommended by the American Heart Association (AHA) and International Liaison Committee on Resuscitation (ILCOR) new guidelines. This treatment can be easily accomplished by simply adding ice or cold packs to the inside of the product in which the patient is wrapped into. The Mylar lining of the Cocoon will retain the cold and effectively lower the patient’s core temperature. As recent data has determined, it is crucial that this cooling process begin immediately to provide the maximum benefit to the patient’s recovery.

Code	Description	
FSCO-Heavy	Disposable Cocoon Stretcher	195.00

Double Fold

This reusable lightweight aluminum pole stretcher feature two heavy-duty tubular aluminum poles with two cross spreader bars. This stretcher can be folded in half for easy storage. This stretcher is ideal for any first aid room, construction site, sporting event/facility, school, office and commercial complex. Tubular Applicator

This applicator is for use with the Surgitube gauze bandages and Surgigrip tubular elastic support bandages.

Code	Description	
FGT-TA0	Tubular Gauze Applicator, Size 0, 2.5cm	91.20
FGT-TA1	Tubular Gauze Applicator, Size 1, 4cm	99.10
FGT-TA2	Tubular Gauze Applicator, Size 2, 5cm	107.15
FGT-TA3	Tubular Gauze Applicator, Size 3, 10cm	149.05
FGT-TA4	Tubular Gauze Applicator, Size 4, 15cm	166.00
FGT-TA5	Tubular Gauze Applicator, Size 5, 20cm	193.55

Support Tensor Crepe Bandage

These non-adhesive elastic support bandages are made of premium quality acrylic polyester and high tensile strength rubber. These bandages provide firm support and adjustable compression in the treatment of sprains and strains. They are ideal for occupational/sports injuries while stabilizing cold and hot packs. Bandages come with two clips for easy application and are washable and reusable.

Code	Description	
FST-10/4.5	Regular Elastic Support Tensor Bandages (10cm x 4.5m)	2.20

FST-15/4.5	Regular Elastic Support Tensor Bandages (15cm x 4.5m)	2.60
FST-5.0/4.5	Regular Elastic Support Tensor Bandages (5cm x 4.5m)	1.30
FST-7.5/4.5	Regular Elastic Support Tensor Bandages (7.5cm x 4.5m)	1.80

Self-Adherent Wraps

A self-adhering cling wrap designed to provide firm support and adjustable compression. No pins or clips required. This wrap is extremely lightweight and comfortable and does not adhere to skin or dressings. It is easy to apply and can be cut to any size. Ideal for occupational/sports related injuries, sprains, muscle and joint support, stabilizing cold and hot packs, etc.

Code	Description	
FSW-10/4.5	Self-Adherent Wrap, 10cm x 4.5m	8.10
FSW-2.5/4.5	Self-Adherent Wrap, 2.5cm x 4.5m	3.05
FSW-5.0/4.5	Self-Adherent Wrap, 5cm x 4.5m	4.25
FSW-7.5/4.5	Self-Adherent Wrap, 7.5cm x 4.5m	6.40

Safety Products > Tape

Cloth Tape

This durable premium grade hospital tape is made from bleached cotton and has a zinc oxide adhesive backing, which is gentle on skin. It is easy to cut and tear.

Code	Description	
FTC-1.25/2.25	Cloth Tape (1.25cm x 2.25m)	.40
FTC-1.25/4.5	Cloth Tape (1.25cm x 4.5m)	.70
FTC-1.25/9.0	Cloth Tape (1.25cm x 9m)	1.25
FTC-2.5/2.25	Cloth Tape (2.5cm x 2.25m)	.70
FTC-2.5/4.5	Cloth Tape (2.5cm x 4.5m)	1.30
FTC-2.5/9.0	Cloth Tape (2.5cm x 9m)	2.40
FTC-5.0/4.5	Cloth Tape (5cm x 4.5m)	2.10
FTC-5.0/9.0	Cloth Tape (5cm x 9m)	4.15
FTC-7.5/4.5	Cloth Tape (7.5cm x 4.5m)	3.50
FTC-7.5/9.0	Cloth Tape (7.5cm x 9m)	8.20

Clear Medical Tape

The clear Medical Tape is a hypo-allergenic, non-irritating, transparent tape that is gentle on the skin during application and removal. It is easy to tear across or down the middle. It conforms to all parts of the body and is designed to be used for IV's, tubing, and for securing bulky wound dressings. This tape is air permeable.

Code	Description	
FTMC-1.25/9.0	Clear Medical Tape, 1.25cm x 9m (24 Rolls/Box)	50.10
FTMC-2.5/9.0	Clear Medical Tape, 2.5cm x 9m (12 Rolls/Box)	50.10
FTMC-5.0/9.0	Clear Medical Tape, 5cm x 9m (6 Rolls/Box)	50.10
FTMC-7.5/9.0	Clear Medical Tape, 7.5cm x 9m (4 Rolls/Box)	50.10

Paper Medical Tape

This hypo-allergenic gentle tape is easy to remove and will not leave any adhesive residue. It conforms to all parts of the body and is designed to be used for sensitive skin, eye and facial dressings, repeated tape applications, general dressings, and securing ostomy appliances. Tape is porous and air permeable.

Code	Description	
FTMP-1.25/9.0	Paper Medical Tape, 1.25cm x 9m (24 Rolls/Box)	47.35
FTMP-2.5/9.0	Paper Medical Tape, 2.5cm x 9m (12 Rolls/Box)	47.35
FTMP-5.0/9.0	Paper Medical Tape, 5cm x 9m (6 Rolls/Box)	47.35
FTMP-7.5/9.0	Paper Medical Tape, 7.5cm x 9m (4 Rolls/Box)	47.35

Tri-Cut Tape

This durable premium grade hospital tape is made from bleached cotton and has a zinc oxide adhesive backing, which is gentle on skin. It is easy to cut and tear.

Code	Description	
FTT	FTT	9.10

Tape Remover

The Tape Remover is a mild, non-irritating solution that removes excess adhesives and residue that may be left over on the skin surface after the removal of the dressing.

Code	Description
